

REPORT

Identification	Project Number: (as assigned by CBSC)
Project Name:	Seabed Classification Workshop

Financial report	Resources			Comments
	requested	allocated	spent	
Contribution by countries involved				
Contribution by other parties				
Contribution from CBSC Fund	15,000	15,000	13,517.50	
Total Cost (Euros)	15,000	15,000	13,517.50	
Breakdown of CBSC Fund expenditure (i.e. travel expenses, per diem, venue hire, etc.)				
Items	Amount			
	MYR	Euro		
Accommodation	15,210.00	3,802.50		
Meeting Room Package	8,100.00	2,025.00		
Workshop Material and Computer Rental	3,510.00	877.50		
Lecturer Airfare	9,992.00	2,498.00		
Lecture Fee	3,200.00	800.00		
Lecture Local Travel	144.00	36.00		
Participants Round-trip Airfare	13,914.00	3,478.50		
Total	54,070.00	13,517.50		

Results	
Date of start	25 June 2012
Date of finish	28 June 2012
Changes in scope or focus	-
Results achieved (output, product, etc.)	<ul style="list-style-type: none"> 13 participants attended the workshop, including 11 students from EAHC MS, 1 student from non-MS (Vietnam) and 1 lecturer Dr. Jon Preston from Canada. Students exposed to the principle and practice of Acoustic Seabed Classification. Student also gained practical knowledge in processing acoustic dataset (multi-beam, single-beam and side scan sonar) for seabed classification.

Comparison with the Achievements and benefits awaited	-
Problems experienced	-
Suggestion for improvement for similar projects	-
Suggestion for follow-up projects	-
Valuation	The workshop was successfully executed even though this is the first time organized by Malaysia. A practical session allowed participant to experience firsthand on how to process and produce the seabed classification using acoustic data. The facilities and learning aids provided were well prepared and useful. The content of the lecture covers broad spectrum in principle and practice of seabed classification process particularly on acoustic methodology. The lecturer is well prepared and had a broad knowledge on the subject which is invaluable in enhancing the knowledge of the participant and the country they represent as a whole.

ASSESSMENT

Identification	Project Number:
Project Name:	Seabed Classification Workshop

	<i>Performance indicator</i>	<i>Mark</i>	<i>Comments</i>
	Arrangements		
	Organisation of the project	4	The workshop was successfully executed even though this is the first time organized by Malaysia as EAHC member state.
	Involvement (contribution) of		
	National partners	-	
	Regional partners	5	Thailand as the EAHC chairman played an important role to assist Malaysia in conducting this workshop.
	RHC	5	All EAHC member states had given full commitment by sending participant/s to attend the workshop.
	IHB	5	
-	Efficiency of the project		
	Goals achieved	4	
	Planned timing	4	
-	Future perspectives		
	Need of similar project (locally, regionally)	5	This course/workshop should be one of the CB core courses and conducted annually.
	Impact on future development	5	Further enhance the quality of the nautical products.
-	Procedure of CBC		
	Application form	4	
	Support received	5	
	Follow up and reporting	4	

Each of the performance indicators indicated in the table is rated according to the scale provided:

0 = 0-20% no goals achieved, no results

1 = 20-40% only some goals achieved or goals only achieved in minor parts

2 = 40-60% about half of the goals achieved, result is only partially satisfying

3 = 60-80% nearly all major goals achieved, result is almost partially satisfying

4 = 80-90% all major goals achieved, result is satisfying

5 = 90-100% all goals completely achieved, result is absolutely satisfying, more than expected
