GENERAL SPECIFICATIONS

(Please provide detailed information in Annex of no more than three pages)

Background information	An awareness of hydrography is missing in many of the Southern Africa and Islands coastal states. This is evidenced by the lack of engagement with the RHC where few, if any, of the Associate member states attend meetings unless they are sponsored.
Justification of the project	It is suggested that a fully-funded seminar or workshop on hydrographic awareness to precede the next meeting of the SAIHC would assist in the crucial task of raising awareness of the subject. It would provide a platform to get greater involvement from the SAIHC Associate Members.

Countries involved	Angola, Comoros, Kenya, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Seychelles and Tanzania
Exposition of the problem	The benefits of good hydrography to support all manner of maritime activity is not well understood at the higher levels of Government in many SIDS in the SAIHC region. This manifests itself in the poor attendance at the Regional Hydrographic Commission (SAIHC) meetings where such benefits are promoted. The target audience for an awareness raising seminar would be Permanent Secretary (or equivalent) level from a relevant national Ministry, who would then also attend SAIHC16.
General objective	To ensure that countries in the SAIHC region are made aware that the provision of hydrographic services is an international obligation under treaty law affecting all Member States (MS) of the IMO and also provides

	significant national infrastructure and long-term economic benefits. The Seminar is configured to assist countries on how they take the necessary steps to meet their obligation noting that most SAIHC countries are IMO MS but not IHO MS.
Specific objectives	<ul style="list-style-type: none"> • To understand the importance of nautical information • The basic activities of hydrographic offices: the IHO M-2 publication and how it relates to National Maritime Policies and Hydrographic Services • The organization of a National Hydrographic Office • The application of hydro-cartographic products and services • Working with a PCA (primary charting authority)
Outputs/Products	Participants will gain a better understanding of the regulatory framework which supports hydrography and how this can benefit a coastal state (Blue Economy etc)
Other deliverables	Participants will be encouraged to join the IHO
Achievements and awaited benefits	

Schedule of activities	1-day Seminar to proceed the 16 th SAIHC meeting, venue to be decided
