

Outcomes TWCWG3

PS

- The PS is in compliance with S-111 v 3.0.0 and in compliance with the HDF5 file formatting as proposed at S-100WG3.
- The PS is in a very mature form. It is now in its 13th version, and has been presented to, and reviewed by, TWCWG several times.
- Several MS have reported they have delayed testing the HDF5 files until an official version of the standard is released.
- The PS is in a very mature form. It is now in its 13th version, and has been presented to, and reviewed by, TWCWG several times.

Engagement with S-100WG

- Partially discussed in Tuesday session.
 - Recommendation S-111, S-104 or TWCWG have more representation in S-100WG. (will be presented to HSSC10)
- WG choice on the way we'll report to HSSC (M3 2/2007 resolution : Guidances on formalisation of approval of the PS) rapidly approaching a release time.

Data archeology

- During the next GLOSS meeting, a possible session could be organized and dedicated to data archeology (Workshop framework)
- IHO member participation would be a good point (Thorkild Aarup, IOC at secretariat)
- There is a strong recommendation (from more and more Services, EU) to pay attention to this exercise.
 - Interest for climate science
 - Data rescue
 - And more
