Proposals for New INT Charts

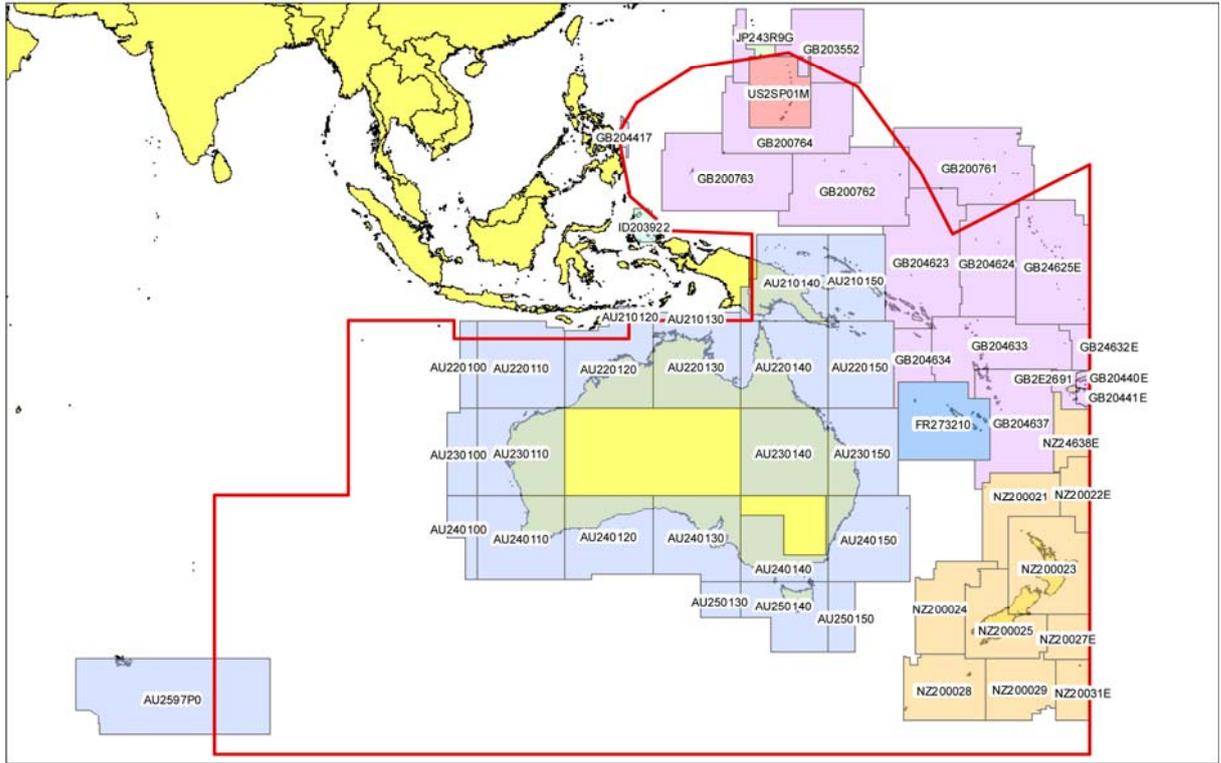

On French waters around Wallis & Futuna, SHOM produces the chart FR7283 (INT358) at scale 1:1M (9°40'), SHOM wish to propose it as a new INT chart.

On French waters around New Caledonia, SHOM is producing a chain at scale 1:300000.. FR6768 (INT6844) and FR6686 (INT6843) have to be edited to add INT number
- FR7760 (INT 6840), FR7761 (INT6841) and FR7762 (INT6842) : are underway (FR7761 and FR7762 expected to be published in 2017 and FR7760 in 2018).

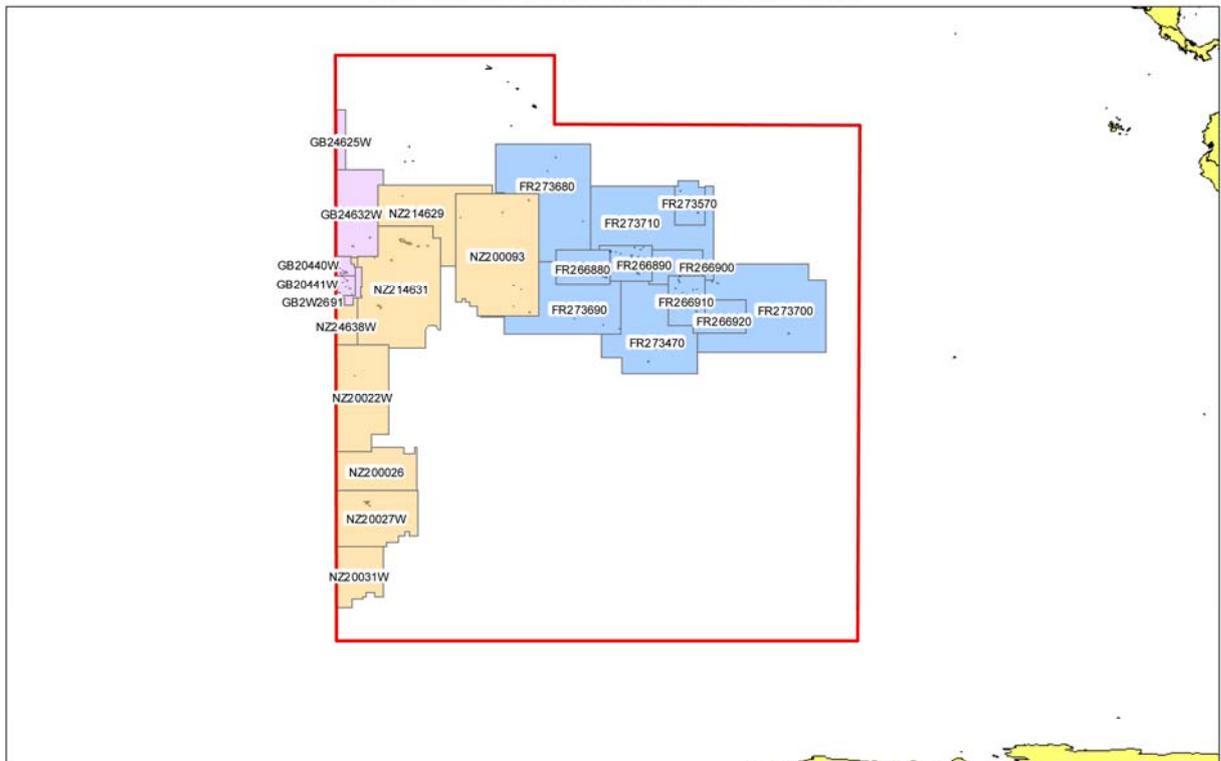

SWPHC East ENC General Usage Band

SWPHC West ENC General Usage Band

Legend

Overlaps of Navigation Purpose 1 and 2 ENC cells in SWP

- Australia is aware of overlaps with Australian ENC cells and those produced by Indonesia, Russia, China and Japan.

Engagement with non Producer Nations in SWP

Within the South West Pacific, the Producer Nations of New Zealand, UK, France and Australia have reported good working relationships with the Hydrographic Offices / National Maritime jurisdictions and/or Governments of the countries they chart.

Australia attends the annual Papua New Guinean National Maritime Safety Authority (PNG NMSA) planning meeting to discuss with PNG NMSA and Port and Shipping Company representatives their charting requirements and priorities.

Adherence to WEND principles

ENCs are distributed worldwide via the following mechanisms:

Producer nation	Mechanism
France	PRIMAR RENC
Australia	IC-ENC RENC
New Zealand	IC-ENC RENC
UK	IC-ENC RENC
US	

Recommendations for discussion at SWPHC 14

1. Members of the SWPHC note this report
2. IHO agree to use of INT Chart numbers proposed by France
