

# 5th Meeting of the IHO Council

## **S-100 Testbed Project**

### **Agenda Item C5-07.6A INF**

C-5, VTC, 19 – 21 October 2021

# IHO BACKGROUND

International Hydrographic Organization

- KHOA NOAA S-100 Test bed
  - ✓ Work on the operation of S-100 testbed framework
  - ✓ Support the systematic introduction of S-100 based on the Roadmap
  - ✓ S-100 viewers, Shore based ECDIS, Sea trials
- IHO S-100 Development
  - ✓ Production tools, Product specifications including S-98..

S-100 Viewer

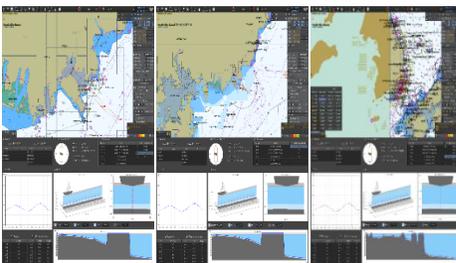

Full Mission Bridge Simulator

Sea trials

Shore based ECDIS

S-100P

C-5, VTC, 19 – 21 October 2021

IHO

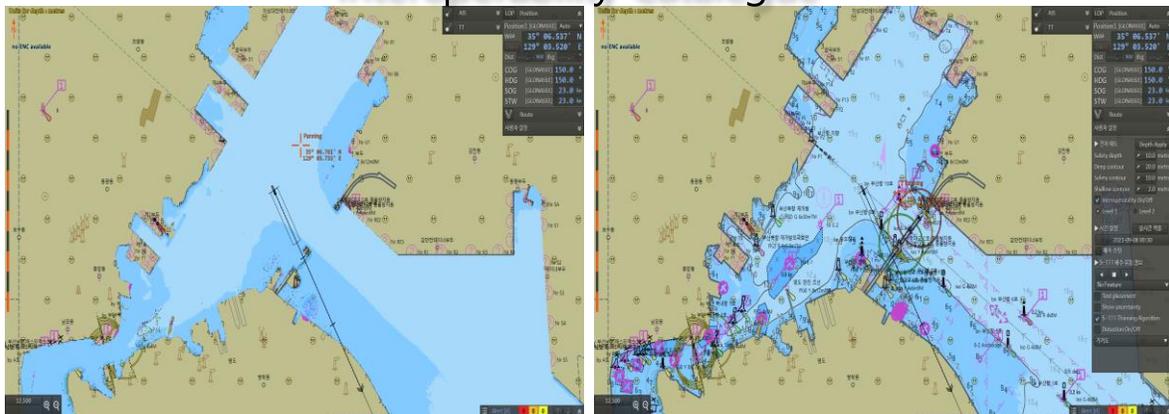

# KHOA S-100 TESTBED PROJECT IN 2021

Details: (Day 1) Testing technical issues

- ✓ interoperability catalogue
- ✓ alert & indication
- ✓ S-111 thinning algorithm
- ✓ S-101 ENC new symbols

(Day 2) Fundamental review to measure quantitatively the usability and benefits of S-100 hydrographic data services

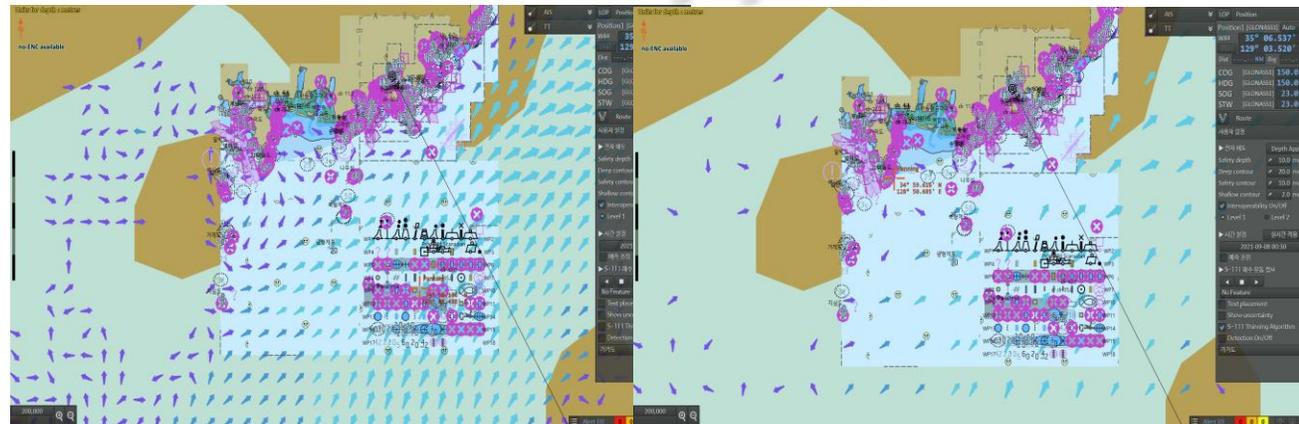

Interoperability Catalogue

Level 0: S-101 ENC + S-102 Bathy

Level 1: S-101 ENC + S-102 Bathy  
(Interleaving)

S-111 thinning algorithm

# IHO WORK PLAN

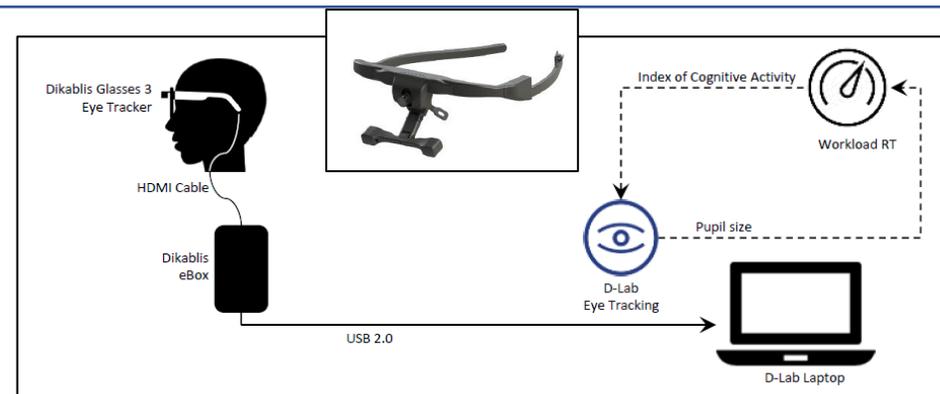

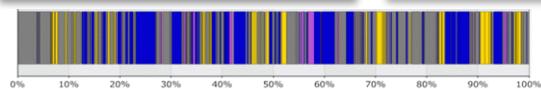

Internat  
Hydrogr  
Organiz

Efficiency  
measurement of  
using S-100 data

- S-100 data service will improve safe and efficient navigation
- No research on the effectiveness, Concerns on the great impacts to the industries and unknown compatibility issues
- Quantitative data of S-100 implementation will support to emphasize the needs for the S-100 data service to the industries and other international organizations

Comparison test  
(eye tracker)

- Dual Fuel concept using S-57 ENC and S-101 ENC
- Measuring the usability and efficiency of using the S-100 data compared to the existing nautical products
- Unit task definition and time measurement for route planning and preparation

# IHO WORK PLAN

International  
Hydrographic  
Organization

- Eye tracker trial

IHO

## ACTIONS REQUIRED

International  
Hydrographic  
Organization

- Actions Required of Council
  - ✓ The IHO Council is invited to note the activities of KHOA and NOAA.
  - ✓ KHOA-NOAA S-100 Testbed project invites the IHO Council to note the approach to measure the efficiency quantitatively for the use of S-100 data service and suggest other participants or measures.
