

# Instructions for Group Work

Kazufumi MATSUMOTO (Project Officer, Japan)

IHO

# CONCEPTS

International  
Hydrographic  
Organization

Main objective of this group work is to:

- Strengthen your network through discussion and collaboration beyond the alumni year and alumni country; and
- Share your experience and your office's situation with others.
- The groups were created with a mix of the alumni year and alumni country.
- There is no competition and no grading of this activity.

IHO

# INSTRUCTION 1

International  
Hydrographic  
Organization

- 8 groups (6 alumni per group)
- 4 themes. Each group is assigned one of the themes (no choice).
- 3 sessions (Discussion > Preparation > Presentation).
- Discussion and Preparation sessions: 90 minutes each.
- Presentation session: 120 minutes.
- 10-minute speech by each group. Presentation format is at the group's discretion.

IHO

## INSTRUCTION 2

International  
Hydrographic  
Organization

- In the Discussion and Preparation sessions in the morning (and lunch, if necessary)....
  - please agree your main discussion points and conclusions; and
  - decide who will present and how. Work together on the presentation format.
- In the Presentation session in the afternoon....
  - all members of each group come to the stage (please decide who makes a speech – it could be one of, or even all of the group).

# THEMES

International  
Hydrographic  
Organization

1. **[Sharing]** We learned a lot in the cartographic training provided by the UKHO. On returning to our offices, were there any obstacles to sharing our knowledge/experience with our colleagues? Do we have good examples of professional development in our offices and what more could we do?
2. **[Chart Data]** Paper charts and ENCs are primarily produced for navigation. What other purposes could their “data” be used for and how could it be distributed to the public? Are there any examples of this within your group?
3. **[International Projects]** How do we best prepare our staff to be future leaders in the world of hydrography? What training could be put in place to help us and our colleagues play important roles in international projects?
4. **[Future of Navigation]** How are our offices preparing for the S-100 world? Are there any key barriers to progress and how could we overcome them? How do you predict nautical cartography changing in the “AI era”?
