

## **TeamSurv Update**

Tim Thornton

18 June 2020

Even though the TeamSurv CSB project isn't running any more, we're still manufacturing the hardware, and looking for organisations that can use the software/tools/IP that we developed.

We're working with Seabed 2030 to supply loggers for S Africa and Palau, and have also supplied some to Perth in Australia.

Also setting up a discussion with Seabed 2030 to see what data/tools/software that we have will be of interest to them.
