

SCUFN 34's MALAYSIA STATEMENT

Malaysia submitted 11 features, 10 of the features are within 200 nautical miles in our waters. Kadayan hill is the only feature located 230 nautical miles from Malaysia's coastal and inside the area of Extended Continental Shelf Joint Submission between Malaysia and Vietnam. The Ministry of Foreign Affairs of Malaysia has acknowledged NHC that they will inform the Republic of Vietnam through the diplomatic channel. NHC will produce the consultation document as soon as we received it.

National Hydrographic Centre (NHC) also would like to inform the meeting that the remaining 10 features are located well inside 200 nm of Malaysia's. Even if we cross-referenced with Marine Regions Map, all these 10 features inside Malaysia's water. Therefore, Malaysia humbly requests all the SCUFN members to consider our submission and proposal.
