SCUFN35.2/02		After careful considerations of the effective participation of SCUFN Members in SCUFN meetings since 2020, concerning their involvement in the intersessional work, recognizing the benefit of commitments for some in research campaigns at sea, noting the pandemic situation in 2020 and 2021 that led to several sub-meetings in VTC format, SCUFN agreed that there was no need to apply ROP 2.5 to anyone yet. SCUFN Membership to be reconsidered at the next meeting, so all Members are kindly invited to secure their physical participation in 2023.	Decision. Complete. SCUFN-36. Complete. Decision/ Action	Agenda Item	Details	Status & Comments (August 2023)
SCUFN35.2/05	3.2	<p>While recognizing that the last version of the <i>Cookbook on Generic terms</i> is a very useful tool for SCUFN routine activities, SCUFN agreed that it was necessary to clarify the future of this <i>Cookbook</i> in relation to other similar initiatives by the scientific community (such as Harris et al's <i>Geomorphology of the oceans</i>, Marine Geology, 2014, http://dx.doi.org/10.1016/j.margeo.2014.01.011) and B-6. This decision was also made in light of SCUFN being made aware of the work accomplished by the Norway (MAREANO), Ireland (INFOMAR), UK (MAREMAP), and Australia (Geoscience Australia) Geomorphology Working Group known as MIM-GA (see Dove et al., 2020, 10.5281/ZENODO.4075248).</p> <p>Noting the various comments and concerns raised by SCUFN Members, SCUFN agreed to put on hold version 1.2 October 2022 of the <i>Cookbook for generic terms</i> and decided not to make it available on the main SCUFN webpage for the moment (could create confusion to the proposers between formal definitions in B-6 and Cookbook).</p> <p>SCUFN invited SCUFN Member Mackay to make a proposal at the next meeting on the way forward for this Cookbook, on the existing relationship and possible coordination with multi-initiatives by the scientific community and the national geological surveys for developing a "standard" on generic terms that should be aligned with B-6 definitions (incremental development, eventually through a new Edition) and the SCUFN Cookbook for generic terms.</p>	<p>Decision. Complete.</p> <p>Decision. Complete.</p> <p>In progress. SCUFN-36</p>
	3.3	Report and Recommendations of the SCUFN Sub-group on Generic Terms

SCUFN35.2/06	3.3	<p>On the issue “<i>Features consisting a part of abyssal hills</i>” SCUFN agreed with SCUFN Member Ohara’s recommendation (case-by-case assessment for the time being, use of neutral colour scale, eventually rainbow colour scale, and multiple cross-profiles to be provided in proposals).</p> <p>To be considered in future edition of B-6.</p>	Decisions. 	3.4	Minor Features and Horizontal Strategy	
SCUFN35.2/07	3.4	<p>SCUFN noted SCUFN Member Ohara’s Consolidated Proposal of integrated version of recommendations including Horizontal Strategy on Minor Features.</p> <p>SCUFN agreed on the recommendation related to Minor Features to be included in a future Edition of B-6 (Doc. SCUFN35.2-03.4A refers) (“<i>SCUFN does not have any minimum size for features to be named. However as with terrestrial features, undersea features generally less than a few hundred meters across are usually not named except in special case that are usually based on historical and/or scientific significance. In these special circumstances, the proposer of the name of a minor undersea feature would need to describe the reason for proposing a minor feature in a proposal</i>”).</p>	Complete. Decision. Complete. SCUFN-36
SCUFN35.2/08	3.4	<p>On the issue related to the definition of an optimal horizontal resolution strategy between features, noting the development of automated feature detection tools in progress, knowing the GEBCO grid resolution (target Seabed 2030), SCUFN agreed that a Project Team (lead: SCUFN Member Coffin, supported by Ms Anna Hendi (UFN PT Chair), Ms Britt Lonneville (Marine Regions), and in liaison with NOAA (Ms Jennifer Jencks/Mr Chris Slater, as GEBCO Gazetteer Operator) to propose some recommendations at the next meeting (Doc. SCUFN35.2-03.4 refers).</p>	SCUFN-36. In progress.

Decision/ Action	Agenda Item	Details	Status & Comments (August 2023)
SCUFN35.2/09	3.6	<p>SCUFN noted the SCUFN Member Ohara’s consolidated proposal of integrated version of recommendations, in particular proposals for variant or alternate names.</p> <p>However, SCUFN considered that more operational criteria need to be defined to improve the robustness of the decision-making process in the future. Based on Doc. SCUFN35.2-03.6A considered as version 1.0, an enhanced version (led by SCUFN Member Kimeli) to be provided prior to the next meeting. Meanwhile decisions to be made on a case-by-case basis.</p>	<p>Complete.</p> <p>In progress. SCUFN-36 (- 2 months)</p>

Complete.</p>
