16h20-17h	<p>4. Legal Representation of Maritime Limits on the EU websites, documents, maps.. <i>(Shom) Visio conf J Smeekaert and D. Carval and All</i></p> <p>4.1 Necessity to deliver information about the way to find the uptodate official data for maritime limits in each EU member State to the managers of EU portals; EMODNET, EEA, Atlas of the seas. Example of wrong representation of maritime limits for France.</p> <p>Like the work we did with the coast line, we propose to identify the sources of official data in each EU country and deliver this info to the managers of EU marine info-platforms.</p> <p>4.2 Representation of Maritime Limits by the EU Member States</p> <p>With the experience of 6 EU projects on maritime spatial planning, we have noted difficulties in the representation of maritime limits to have a global basin or European picture. The INSPIRE representation, tested, doesn't satisfy all the needs of MSP.</p> <p>To compensate this, the countries adopt their own representation system. Example of results in EU-Maritime Spatial Planning Projects Shom. How to present a global EU picture for the end-users involved in sustainable development, blue economy, maritime security ...first step with data models of IHO 121?)</p> <p><i>Doc IENWG-10-04.1A example of Maritime limits for France in EEA website</i></p>
