Dear all,

At first, all the Shom's team wish you a beautiful new year 2023!

As we evocated, the next European Maritime Days will be organized "in presence" on 24th and 25th May 2023 in Brest.

https://maritime-day.ec.europa.eu/index_en

At this occasion, and to give us the possibility to participate to all the events with the different representatives of the EU Commission, we propose to organize our

next IENWG 13 meeting on 23th May 2023 in Brest!

A first agenda will be sent soon and we will propose you :
A meeting in the hearth of Brest, near the tramway.

On 23th morning,

- We are in touch with Remy Denos (responsible of the Mission Ocean at the DG MARE) to share some information about the place of the bathymetry in Europe (we will send you a sort of questionnaire to prepare this part of the meeting).
- A point will be done on the developments of the EU data legislations around **re-use of data and high value data sets** published just at the end of last year and joined to this message (links below)
- Presentation of the state of play of the CISE project, the links with the main maritime EU agencies and an example of one Member State organization.
- Presentation of the Shom's project of digitalization of navigational warnings (PING) and developments done through a EU project "MED Osmosis"
- Presentation of European projects done by the different HOs (To all please send us before the end of April the link to the projects you would want to present or a short power point of presentation)

In the afternoon,

- We will be involved in a special session of the European project EMB MBRC around the necessity to take into account better the maritime security in the process of maritime spatial planning.
- At the end of the afternoon, we will end our agenda

We are at your disposal to integrate all topics you would want to add before the 15th of April 2023.

We thank you to inform us about your participation to the meeting before the 15th of April 2023

Re-use Directive

For your information and comments:

COMMISSION IMPLEMENTING REGULATION (EU) /... laying down a list of specific **high-value datasets** and the arrangements for their publication and **re-use**
