

# Green Deal Data Space

Brief update

Auteur Ton Zijlstra, [t.zijlstra@geonovum.nl](mailto:t.zijlstra@geonovum.nl)

Datum 25 May 2024

# Green Deal Data Space update

- Final results of preparatory work on GDDS presented to EC in April
- EMODNET mentioned as key case and as key data for GDDS

# Green Deal Data Space implementation

- Open call for implementation consortia for GDDS ends this week
- Work to start end of year / early 2025
- Runs 3 years
- EC call aims for economically viable GDDS, and consortia must implement 3 or more use cases that bring viability.
- Unknown whether EMODNET or maritime will be proposed as case by submitting consortia. Not mentioned by EC in call text.
- GDDS will then grow by adding use cases and their actors and data sources
