Dear colleagues and friends,

I am taking the opportunity of this first mail of the year to wish all of you an excellent year 2024. May it be fill with joy and achievements.

As you are most likely aware of, **the next IENWG meeting is coorganised with the Danish Hydrographic Office in Svendborg, Denmark, on the 29th of May 2024.** Please save the date in your agenda.

This date and location has been chosen as the [European Maritime Day \(EMD\) 2024](#) is taking place as a fully-fledged physical event, in the same city, on 30-31 May 2024.

Hendrik has nicely prepared some logistic informations to smooth our arrivals, all gathered in the enclosed document. As Svendborg is a small town and expecting hundred visitors, **Hendrik and I can only recommend you to book as soon as possible your accomodation** : a list of hotels is provided in the document. For any questions regarding the IENWG 2024 meeting, we (Hendrik and I) are here to support you.

The draft agenda for the meeting will be send this month for your review and comments.

Finally, for your information, and following my mail from the 4th of December, the IENWG has proposed 2 workshops which are still under evaluation for the EMD:

- *Seabed 2030 initiative: EU status* with the involvement of IHO representative (Luigi Sinappi - tbc) and the Portuguese hydrographic institute along with EMODnet Bathymetry and Seabed 2030,

- *Digital services for a safer navigation* with the involvement of the Swedish Maritime administration and Shom along with Fintraffic and PRIMAR.

We are confident in the quality of our workshop but know there is some competition. In any case, I will let you know of the results of the evaluation from the EMD organisation team.

Looking forward to meeting you at this event,

Kind regards,

Adeline
