

MSDIWG14

14th Meeting of the International Hydrographic Organization Marine Spatial Data Infrastructures Working Group

IHO Publication C-17 – v. 3.0 – Chapter 1

Portugal – LCDR Telmo Dias

Genoa, January 30th to February 3rd, 2022

IHO

C-17 – Chapter 1

Table of contents

International
Hydrographic
Organization

- 1. Introduction and background – the current landscape**
 - 1.1. C-17 overview
 - 1.2. What is a Spatial Data Infrastructure (SDI)
 - 1.2.1. Types of SDI
 - 1.3. MSDI and open marine geospatial data value
 - 1.4. MSDI architecture
 - 1.5. Data management principles
 - 1.5.1. DIKW (data, information, knowledge, wisdom) hierarchy
 - 1.5.2. FAIR principles
 - 1.5.3. Quality management system
 - 1.6. IHO implementation status

Annex

- Open source MSDI
- Proprietary MSDI

IHO

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.1. C-17 overview

- ✓ Purpose and scope.
- ✓ Target audience.
- ✓ How it should be used.
- ✓ Chapter structure.

IHO

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.2. What is a Spatial Data Infrastructure (SDI)

1.2.1. Types of SDI

- ✓ What is geospatial data.
- ✓ Importance of geospatial data for decision making.
- ✓ Origins of SDI.
- ✓ Definition of SDI.

- ✓ SDI hierarchy, scale and scope.

IHO

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.3. MSDI and open marine geospatial data value

- ✓ MSDI definition.
- ✓ Value and applications for marine data.
- ✓ HOs roles and approaches.

IHO

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.4. MSDI architecture

- ✓ MSDI typical architecture.
- ✓ Client-server architecture.
- ✓ Web services.
- ✓ Physical components.

IHO

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.5. Data management principles

1.5.1. DIKW (data, information, knowledge, wisdom) hierarchy

1.5.2. FAIR principles

1.5.3. Quality management system

- ✓ DIKW hierarchy (definitions, relations, transformations).
- ✓ FAIR principles (findable, accessible, interoperable, reusable, traceability, licensure, connectedness).
- ✓ Quality management principles

IHO

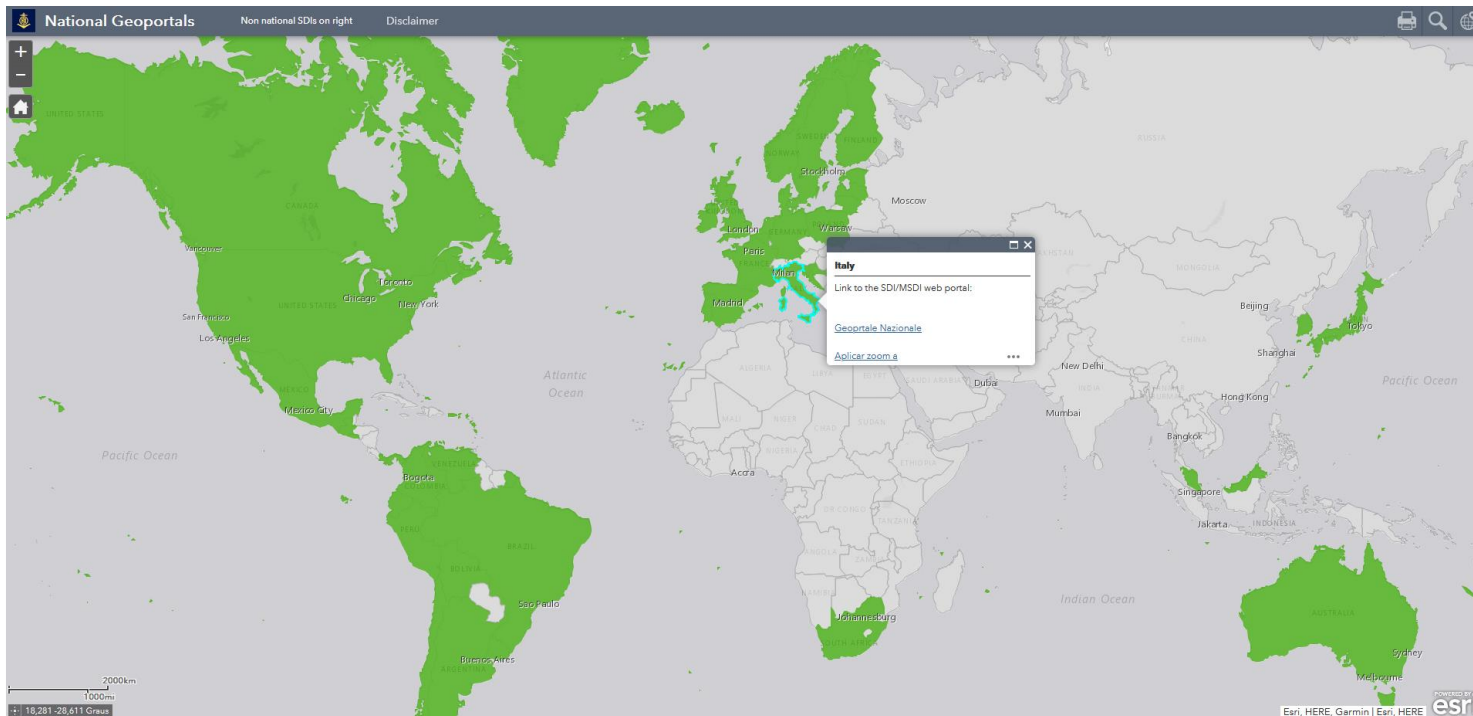

C-17 – Chapter 1

International
Hydrographic
Organization

1. Introduction and background – the current landscape

1.6. IHO implementation status

- ✓ Link to web map with coastal states MSDIs.

Genoa, January 30th to February 3rd, 2022
