Commission hydrographique de l'Atlantique oriental / Eastern Atlantic Hydrographic Commission

RasterMarine CHAtO

To facilitate the transmission of nautical information, Shom is setting up a "RasterMarine CHAtO" product:

- Seamless assembly of Shom's nautical charts in the Region G (extension of the RasterMarine product covering metropolitan France to Region G)
 - Several raster layers depending on the map scale
 - When zooming in / out, the appropriate layer corresponding to the viewing scale is displayed.
- Product updated monthly
- Can be visualized on the portal data.shom.fr
- Opening of the service at the beginning of 2021

Coastal States, for which FR is PCA, will have easy access to up-to-date charts and will be able to report any new nautical information.
