MANAGEMENT OF THE DUAL FUEL PERIOD

Production option for the DF period

Schemes (coverage) in S-101

Dual fuel period principles for coverage:

- **Data coverage must be the same** in S-101 and S-57

[20]: "identical coverage"	Coverage of S-57 will continue to be provided in addition to the new S-101 form to ensure vessels without S-100 ECDIS are able to navigate safely and ensure carriage compliance. "Identical" coverage does not require identical spatial extent of individual ENCs or equal Compilation Scale/Maximum Display Scale of ENCs, nor does it imply identical feature content ¹⁸ . It does, however, imply coverage is at least as safe and appropriate, however.
----------------------------	---

From: S-100 ECDIS Governance Document

- **WEND principles remains** in S-101 (as in S-57)

Schemes (cells) in S-101

- Keep the **same coverage for each cells in S-57 and S-101** seems to be the simplest situation for producers, mariners, VARs, etc:
 - ✓ Consistency in updates and new editions;
 - ✓ Easier catalogue management;
 - ✓ Better customer service.
- In case of rescheming, **schemes in S-57 and in S-101 should be identical**
