

Port Damage Assessment Information

The template below can be used to rapidly assess the overall damage and operational condition of each port waterways relative to depth and obstructions, anchorages, aids to navigation, water hazards, and/or port interface infrastructure after a disaster. The rapid assessment of the situation in the port area is important to be able to conduct post disaster hydrographic surveys.

Port Name:			
Location/Address:			
Contact Name:			
Telephone:			
Email:			
Situation	Y/N	Description/Condition	Location
Is there Debris?			
Are there Obstructions?			
Is there HAZMAT?			
Is there change to the charted depth?			
Are tide gauges working?			
Are the ATON working?			
Is pier usable?			
Are building standing/usable?
