

Srl 22.3 Report to IRCC

Open to the floor... thoughts?

- Note the level of participation at this year's MACHC meeting and the support from partner organisations and Industry.
- Whilst capacity building and S-100 is a concern and challenge for nations within the MACHC Region, the support from the RENCs and the work of the Fund Generation PT signal an increase in opportunities for Member states beyond IHO CB Phase 0 and Phase 1.
- The dissemination of IHO-funded training and opportunities has certainly benefited IHO Member States in the MACHC Region, particularly for the advanced courses.
- Each MACHC Working Group / Committee Chair is invited to provide a short update for the report covering progress over the past 12 months and any opportunities and challenges.
- The draft IRCC report will be shared with MACHC Members for review
