# Information Management for CSOs in Disaster response

ement

Asian Disaster Reduction and Response Network Alan Mills 8 September 2020

and

### What we do

- Humanitarian mapping charity that works through skilled volunteers.
- We help target and coordinate the delivery of humanitarian aid.
- Since 2002 we have responded to around 100 emergencies (plus many more remotely).
- In 2020 Beirut field mission, over 20 projects worldwide remotely.

### About MapAction

Lebanon: Beirut Explosion Socio-economic vulnerability by operational zone

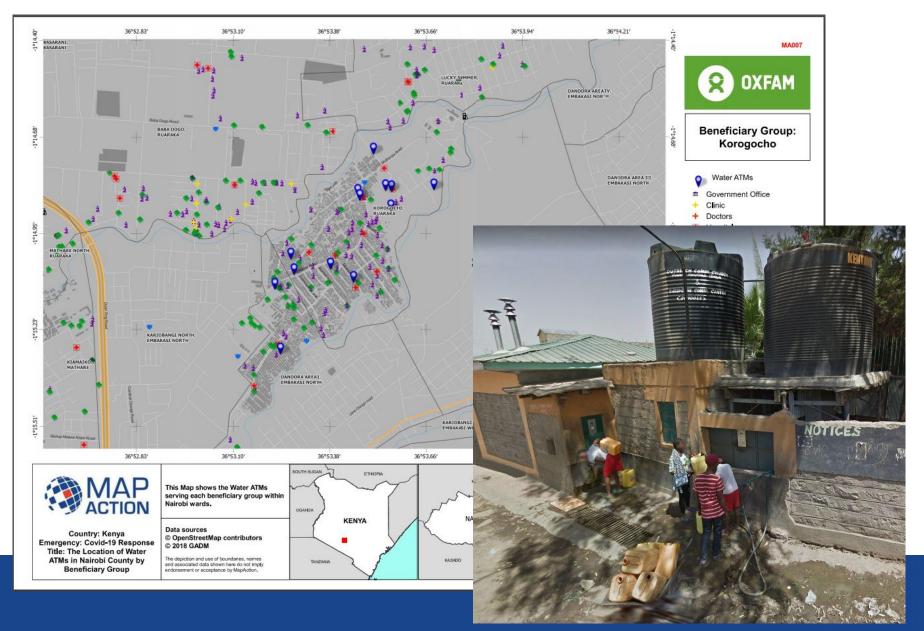

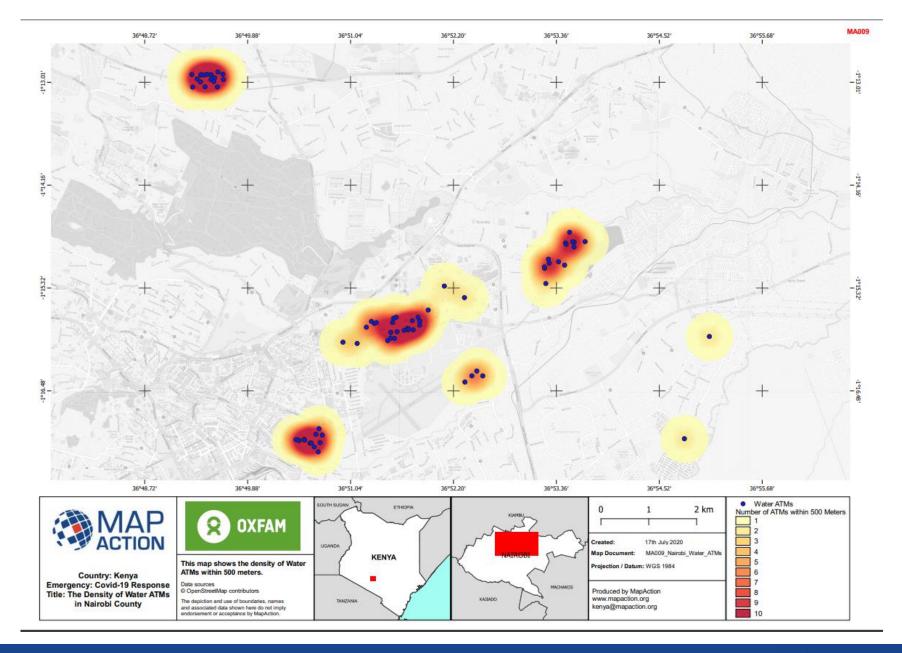

These zones were developed to help coordinate and collaborate on relief efforts at the operational level. Level 3 Administrative boundaries in Lebanon 'Cadasters' were divided into Zones. Those zones will be used as a reference to facilitate the data collection for all different aspects of the response. A Zone can be defined as a cluster of built-up plots separated by the road network within the Administrative Level 3 – Cadasters of Lebanon. The socio-economic status of households living pre-blast in each zone was estimated by UN-Habitat based on (1) a national nanking of 498 disadvantaged area undertaken to inform the ongoing UN-Habitat-UNICEF Neighbourhood Profiling project and [2] a visual assessment in the field on 12 August 2020.

### Not just pretty maps.....

- While the end products are useful, other aspects of what we do..
  - Problem solving
  - Finding the right data
    - Mobile collection
    - Satellite/online/other sources
  - Organising the information
  - Sensible usage of information
    - Protecting the vulnerable
  - Sharing with the right people
    - Communities, peer organisations, the world.

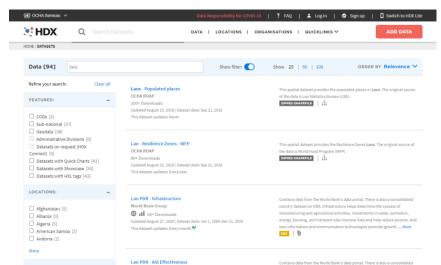

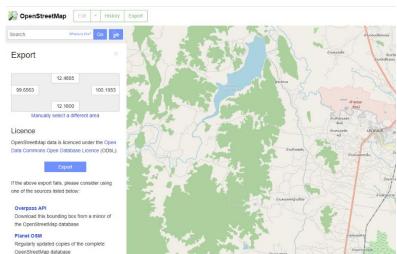

### Information flows and appropriate tools
