CENC Working together to assure navigational safety

IC-ENC to SAIHC 20 – September 2024

Ruth.White@ic-enc.org

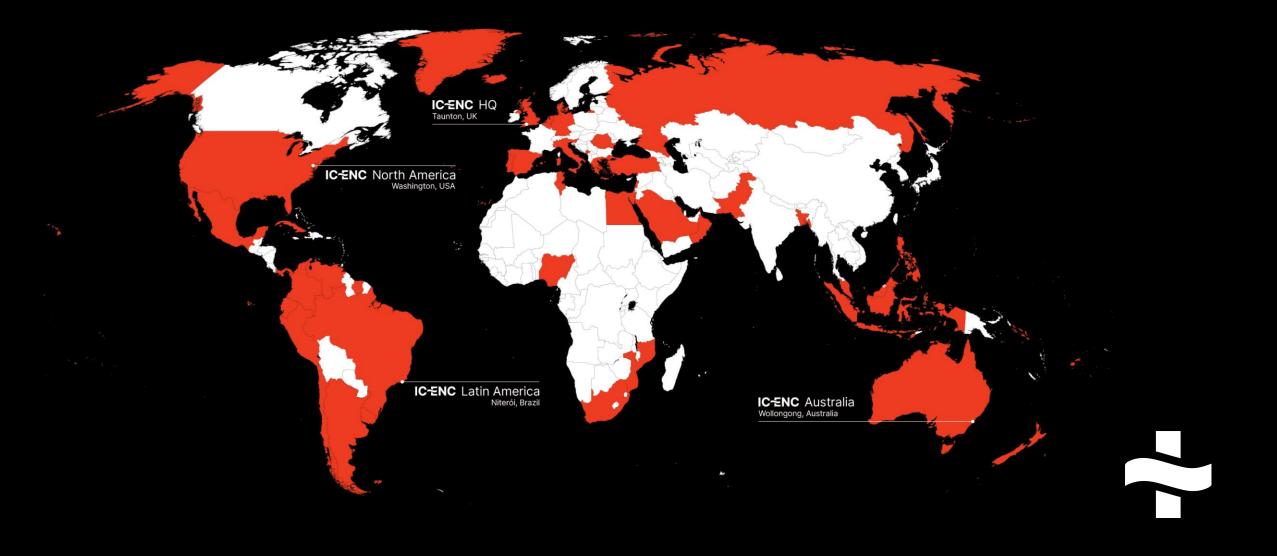

Agenda

In the 15-minute agenda slot, I will cover:

- 1. IC-ENC Overview
- 2. Help and support to Members

Ruth White, IC-ENC Support Officer Based in IC-ENC Headquarters, Taunton, UK ruth.white@ic-enc.org

CENC Working together to assure navigational safety

CENC Working together to assure navigational safety

Help and Support to (new) Members

IC-ENC The IC-ENC community

Becoming a Member of IC-ENC brings you into a **community of other likeminded HOs**.

As a new Member, we can facilitate the sharing of good practice from other HOs to help build your own office's knowledge and skills.

We do this in a variety of ways...

- Face to Face
- Online
- Courses
- Bespoke support
- Learning from other IC-ENC Members
- Supply of ECDIS software with training
- And so on...

Face to face training

We offer face to face training in various locations around the world

- ENC Quality Assurance / Validation
- ENC Conversion

We also offer bespoke training

- At an HO office
- At one of the IC-ENC offices
 - Specific "buddy" appointed as a main point of contact

S-57 to S-101 ENC Conversion Workshop held in Muscat, Oman in May 2024

ENC Conversion Training

- IC-ENC, in collaboration with IIC Technologies, have been delivering conversion workshops during 2024
- Two have already taken place in Oman (May) and Amsterdam (July)
- Two more will be held in Australia (October) and Panama (December)

"Converting S-57 to S-101 initially seemed daunting, but with the support of IC-ENC, I not only enjoyed the process but also gained valuable insights into the conversion mechanism"

S-57 Validation Training

- Two S-57 Validation Training workshops have taken place already in 2024
- Brazil at the IC-ENC Regional Office in Niteroi, Brazil
- UK at IC-ENC HQ in Taunton

"It was an excellent experience; I enjoyed all parts of the course"

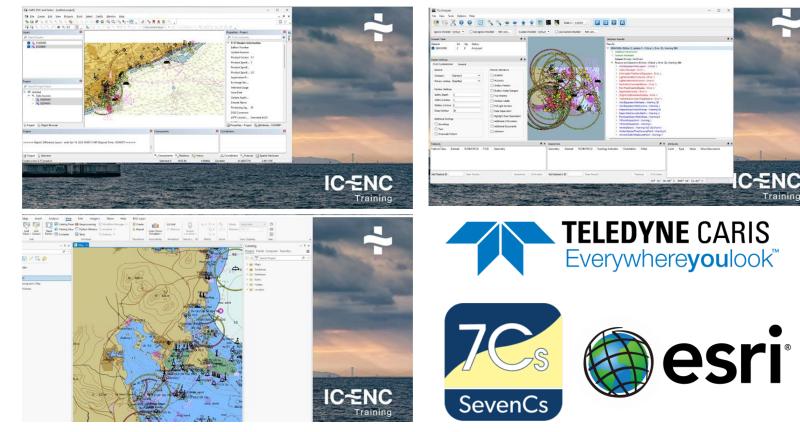

"Enjoy sharing experiences and common problems with other members"

IC-ENC Learning Cloud Environment

Online environment to support face-to-face training and online learning.

Contains software to allow learns to gain practical experience, not just theory

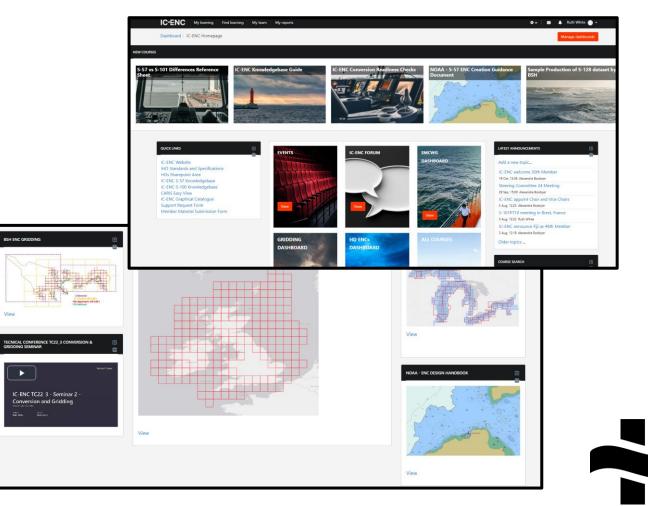

IC-ENC Learning Management System (LMS)

IC-ENC established a Learning Management System (LMS) in 2021.

The LMS provides Members with a rich resource of learning and an opportunity to correspond with each other via the IC-ENC forum.

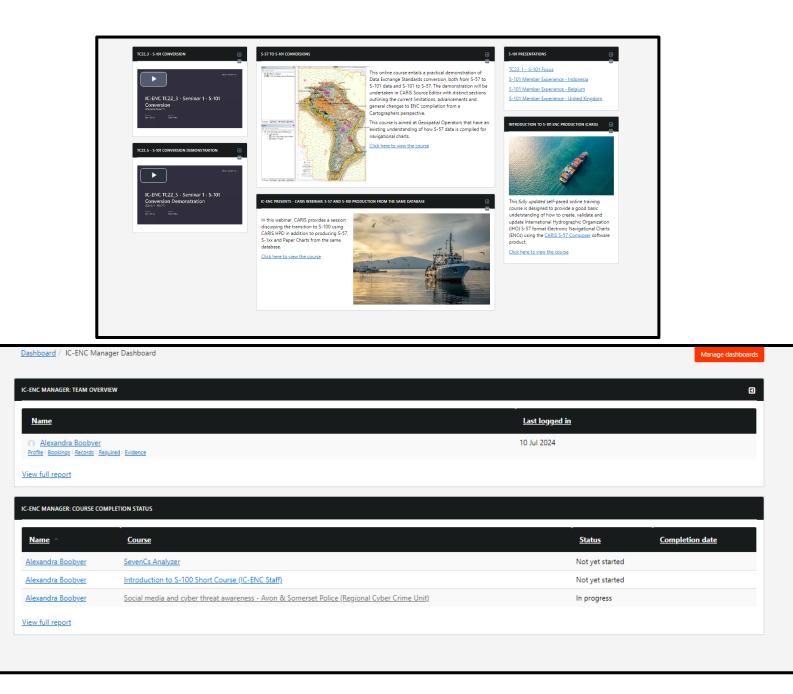

Immediate access to new Members, and the community of over 500 users.

IC-ENC Dashboards

As well as HD ENC and Gridding dashboards, IC-ENC are developing dashboards on other topics with S-101 being the focus of one of these dashboards.

A dashboard has also been created where team leaders can view their teams learning on the IC-ENC LMS.

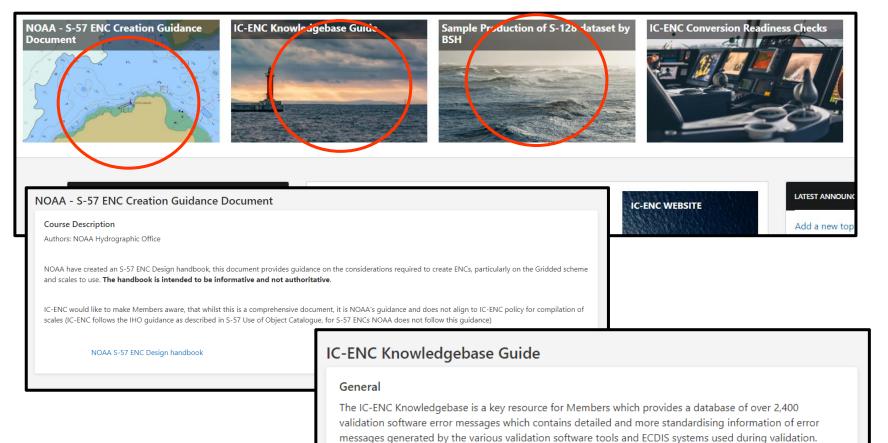

Member Material on the LMS

As part of Member collaboration and information sharing, Members can submit material to the LMS.

Examples of Submissions are:

- An S-57 ENC Creation
 Guidance document from
 NOAA
- A Sample Production of S-128 Datasets from BSH
- IC-ENC Knowledgebase Guide

Here you can find a guide detailing the various ways you can access and navigate the IC-ENC Knowledgebase.

IC-ENC Knowledgebase Guide

Member Material on the LMS

As direct feedback from a Member a S-57 Vs S-101 Difference Reference Sheet was created by our S-100 Support Officer, Laura Tyzack.

This is an easy glance document that will help Members navigate the differences.

NEW COURSES

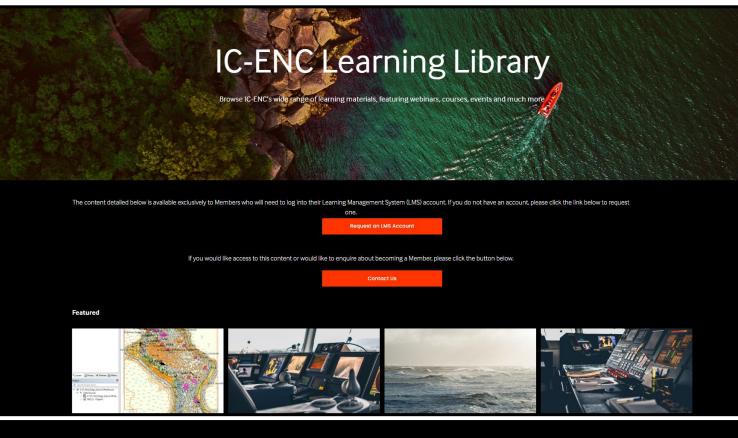

LMS Library Content

Our full LMS Library content can be viewed on our IC-ENC website via the following link <u>LMS Courses — IC-ENC</u>

www.ic-enc.org/lmscourses

Current content includes:

- IC-ENC Conversion Readiness Checks
- Sample Production of S-128 Datasets
- S-57 ENC Creation Guidance Booklet
- S-57 to S-101 Conversion (training recordings)
- Introduction to S-100 (training recordings)
- Industry Webinar (recordings)
- Technical Conference discussion recordings

"The instructors were very kind and very clear. It was a very useful course."

- Servicio de Hidrografía Naval, Argentina | S-57 to S-101 Conversions Course

in to S-101 ENC Production (CARIS) S-101 ENC Production - CARIS S-5

An Introduction on how to create, validate and update An introduction to IHO S-101 ENC Product IHO S-57 format ENCs using the CARIS S-57 Composer. Specification as used to create S-101 Edition 1.0.0 ENCs.

Technical Conference

- Annual event (face to face conference, hybrid), with online sessions throughout the year.
- Community ethos
- Opportunity for IC-ENC to update members on Work Plan progress
- Opportunity for members to share their own S-57 or S-1XX production experiences to help others
- Updates from Industry ENC conversion, S-1XX production and validation tool developments

ENC Validation Service

- Once your office is "up and running"...IC-ENC conducts independent validations on data it receives
- Ensure conformance to S-57 and S-58 standards and IC-ENC Policy
- Provide guidance on improving the quality of the Global ENC Folio
- ECDIS Usability
- Validation Checks conducted by a range of validation tools
 - dKart Inspector
 - 7Cs ENC Analyzer
 - IC-ENC DMD
- IC-ENC Knowledgebase
- Bespoke feedback report produced for each ENC file

Validation Checks

Coverage Checks

- For new editions and new cells IC-ENC checks for gaps and overlap
 - Ensure seamless non overlapping ENC coverage in line with WEND principles
- Gaps and Overlaps are recorded and reported to the producer
- Reports are also provided to Regional Hydrographic Commissions and IHO Working Groups

Consistency Checks

Consistency checks cover the following;

Horizontal Consistency Vertical Consistency

- Ensuring consistent data capture on adjoining and overlapping ENCS to ensure mariner always has a safe display
- Consideration of generalisation and the application of SCAMIN

ECDIS Check

- As part of ENC validation an ECDIS check is included for New Editions and New Cells
- Separately all ENC data is loaded into 3 ECDIS systems to confirm it loads as expected
- This involves visual review of the cell in ECDIS
- Considerations include;
 SCAMIN

Display General usability

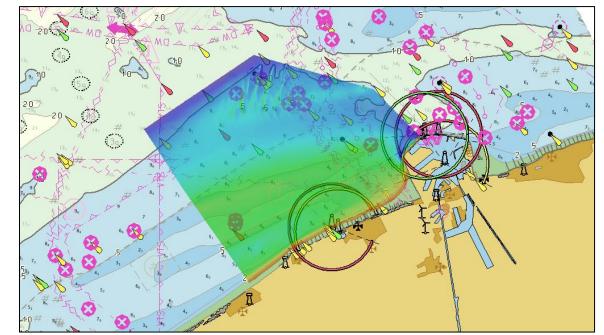

S-57 – S-101 Conversion Readiness Checks

- As part of ENC validation IC-ENC performs S-101 Conversion Readiness Checks on all base cells
- There are currently 20 Checks identified and implemented by IC-ENC
- Checks highlight recommendations for S-57 encoding that can be amended to aid in the automated conversion to S-101 products

A word about S-100....

- We are developing our first-generation S-100 services...
 - S-101, S-102, S-104, S-111, S-122, and S-128
 - Conversion Readiness Service (helping Members prepare S-57 data for conversion to S-101)
- ...with four key goals in mind:
 - 1. Member engagement, ensuring IC-ENC supports its Members with their S-100 prioritisations
 - 2. Community ethos in sharing production experience, recognising that across the IC-ENC Membership, Members are at differerent stages of their transition to S-100, and no-one is left behind
 - 3. Close alignment with the IHO Phase 1/Route Monitoring prioritised product types
 - 4. Increasing automation whilst continuing to provide value add to Members
- We will identify/develop the next generation of S-100 services through further Member engagement

An S-101 ENC overlaid with S-102 data

The S-100 landscape/Challenges:

- S-1XX Product Specifications are still at different levels of maturity
- No published S-100 Validation checks yet which limits validation software tool development
- More test datasets are key to support development and testing phase

Revenue Management – "Opt In" fund

- IC-ENC Members are supporting an 'opt in' fund, whereby a portion of their national ENC revenue is set aside for other projects.
- A growing number of Members have 'opted in' to this new scheme
- USD 450,000 generated for projects for 2024
- Projects supported are for a range of activities including Standards development and **Capacity Building**

Revenue Management – "Opt In" fund

~

ENC Quality & Conversion Workshop

As part of the IC-ENC 'Opt In' Fund initiative, an ENC Quality and Conversion workshop took place in Istanbul for the Mediterranean Black Sea Hydrographic Commission (MBSHC) in May 2024.

" this training helped me to better understand how ENCs are evaluated and what to look for before and after conversion"

Further Training

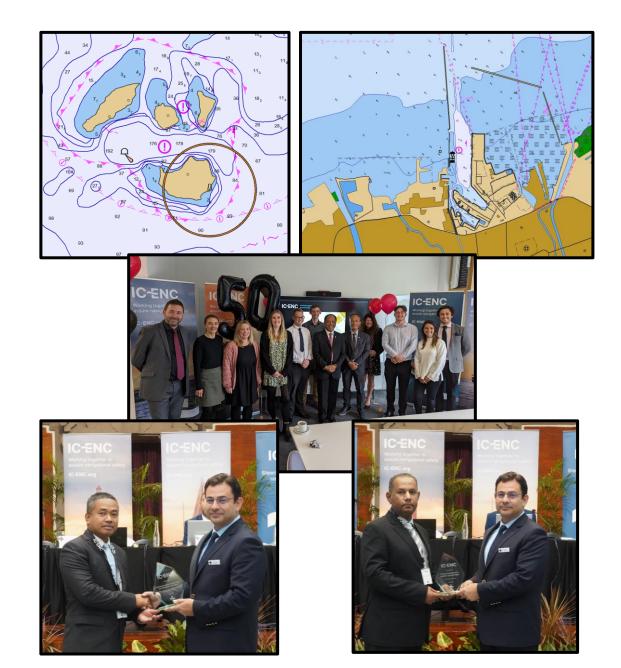

A training procurement framework has been established to enable IC-ENC to have the future **option** of rapidly appointing third party supplies to deliver training, in the following topics (this list remains flexible):

- S-101 Production
- S-57 to S-101 (S-101 S-57) Conversion Workshop
- S-102 workshops, S-104 & S-111 workshops
- ENC Quality and Conversion
- S-100 Database creation, implementation, and maintenance
- ENC Gridding
- Dual Fuel Management
- S-57 S-101 Harmonisation
- Marine Spatial Data Infrastructure (MSDI) workshop
- Seminars on Raising Awareness in Hydrography
- Hydrographic Survey with Unmanned survey Vessel (USV) training

Note, this list is based on IHO Capacity Building stated activities

IC-ENC ENC Highlights

- Over 14,000 files released, including:
 - 1,460 New Cells, 3,600 New Editions and 8,500 updates
- IC-ENC Folio reached approx. 13,000 ENCs
- New Members Data Released
 - Lebanon and Saudi Arabia
- 3 New Members joined
 - Dubai, Indonesia, Thailand

Summary

IC-ENC is supporting its:

- 52 Members,
- 4 Value Added Resellers and 4 Distribution Partners

With their existing ENC requirements and their S-100 transition and future needs

We are a **community** and work together. Others are experiencing the same challenges as your office!

We regularly welcome **new Members** into IC-ENC. All services are available immediately upon joining (i.e. no additional costs etc)

www.ic-enc.org
