

USCHC-42 Summary Action Table

USCHC Action	Action
42-01	Take note of the anticipated rearrangements as discussed above and prepare information for affected shipping industry.
42-02	US and CA to exchange information on staff career development in a new era of hydrography and cartography (data manipulation and presentation skills, job position flexibility, hiring, training and career development).
42-03	CHS and NOAA to follow-up on the issue of coordination in the new Great Lakes Datum.
42-04	USCHC chair to respond to proposed updates on IHO Resolution on RHCs.
42-05	Within the context of the national gridded schemas and the future implications for S-100 products and services, HGPSC to investigate and, using a common methodology, propose a resolution to ENC overlaps.
42-06	Consider how the application of new ENC approaches in the Great Lakes and other S10# products and services come together.
42-07	Introduce these plans to S101 project team to help project team look at scale options and implications for the future.
42-08	Include a US-CA paper and powerpoint to Al Armstrong (USA) for his work as chair of the S-101 Working Group.
42-09	Both nations to engage with the NCWG future of the paper chart effort. CA to articulate the difference, if any, between various approaches, including how the CA Paper Chart 2.0 model offers promise to the hydrographic community. The articulation should be tied to “use case scenarios.”
42-10	CHS and NGS will explore appropriateness of the vehicle Schedule A and propose an update Schedule A, if required. CA and US to review and vet with other partners who may have an interest.
42-11	Monitor OPP plans, including cases where the Schedule A may facilitate efforts, such as Boundary Bank.
42-12	US and CA to report the status of the follow-up described in the above paragraph at USCHC-43, specifically the incorporation of NONNA-100 data into the IHO DCDB and GEBCO Process and lessons learned (if any)
42-13	CHS would like to collaborate and talk about extending presented US gap analysis methodology to the US- CA region.
42-14	US to assess level of effort to extend the gap analysis to CA including in regards to NONNA100 for USCHC
42-15	Solicit an acknowledgement note from GEBCO about how and where NONNA 100 will be reflected in the new GEBCO chart.
42-16	CA to review proposed changes to the IHO Resolution on disasters and incorporate into the USCHC Report to IRCC, and if timely, inform drafting team leads Australia and Japan in advance of IRCC.
42-17	US to evaluate if it will be part of the CA Chart 2 and S100 distribution?
42-18	See if SWHPC provided feedback back to Japan and Australia regarding revisions to the IHO Resolution 2/1997 on natural disasters.
42-19	CA to circulate and draft USCHC report to IRCC and include topics of interest to the work program.
42-20	The USCHC approved and the US to submit to USCHC background summary. (See USCHC42-12A)
