

# ENC Data flow

Version 7 – 26 Feb 2021

## Explanatory Comments

### Version

Version 7, February 2021, for WENDWG11. Cells figures as of Week 01 2021. Prepared jointly by IC-ENC, EA-RECC and PRIMAR. Diagram is simplified for ease of understanding.

### ENC Producers

Mozambique is member of both RENCs, but yet to produce any ENCs.  
Russian Federation is a member of both RENCs, but splits its folio geographically.

### RENC-RENC Co-operation

Data Flow lines:

Orange Dashed line = PRIMAR members' ENCs available to IC-ENC for quality assurance work, through RENC co-operation programme (e.g. French ENCs for consistency check with Belgium ENCs).

### Value Added Resellers / Distributors

All six IC-ENC VARs receive the ENCs under the same terms and conditions. PRIMAR is an appointed IC-ENC VAR.

The combined IC-ENC and PRIMAR members' ENC folio is available under similar sales rules (as far as possible), for example, supporting the Pay As You Sail concept.

### Users

Users benefit from the choice of a variety of services, they select the one that best meets their needs.

Except for:

Non RENC HOs with limited distribution arrangements (i.e. only to one or a few services - the black box / line), users in these areas must use specific services.
