

ENC Data flow

Version 8 – 15 Feb 2022

Explanatory Comments

Version

Version 8, February 2022, for WENDWG12. Cells figures as of Week 01 2022. Prepared jointly by IC-ENC, EA-RECC and PRIMAR. Diagram is simplified for ease of understanding.

ENC Producers

Mozambique is member of both RENCs, but yet to produce any ENC. Russian Federation is a member of both RENCs, but splits its folio geographically.

RENC-RENC Co-operation

Data Flow lines:

Orange Dashed line = PRIMAR members' ENC available to IC-ENC for quality assurance work, through RENC co-operation programme (e.g. French ENC for consistency check with Belgium ENC).

Value Added Resellers / Distributors

All six IC-ENC VARs receive the ENC under the same terms and conditions. PRIMAR is an appointed IC-ENC VAR.

The combined IC-ENC and PRIMAR members' ENC folio is available under similar sales rules (as far as possible), for example, supporting the Pay As You Sail concept.

Users

Users benefit from the choice of a variety of services, they select the one that best meets their needs.

Except for:

Non RENC HO with limited distribution arrangements (i.e. only to one or a few services - the black box / line), users in these areas must use specific services.
