

ENC Data flow

Version 9 – 11 Sept 2023

Explanatory Comments

Version
Version 9, September 2023, for WENDWG13. Cells figures as of Week 36 2023. Prepared jointly by IC-ENC, EA-RECC and PRIMAR. Diagram is simplified for ease of understanding.

ENC Producers
Mozambique is member of both RENCs, but yet to produce any ENCs.
Russian Federation is a member of both RENCs, but splits its folio geographically.

RENC-RENC Co-operation
Data Flow lines:
Orange Dashed line = PRIMAR members' ENCs available to IC-ENC for quality assurance work, through RENC co-operation programme (e.g. French ENCs for consistency check with Belgium ENCs).

Value Added Resellers / Distributors
All four IC-ENC VARs receive the ENCs under the same terms and conditions. PRIMAR is an appointed IC-ENC VAR.
The combined IC-ENC and PRIMAR members' ENC folio is available under similar sales rules (as far as possible), for example, supporting the Pay As You Sail concept.

Users
Users benefit from the choice of a variety of services, they select the one that best meets their needs.
Except for:
Non RENC HOs with limited distribution arrangements (i.e. only to one or a few services - the black box / line), users in these areas must use specific services.
