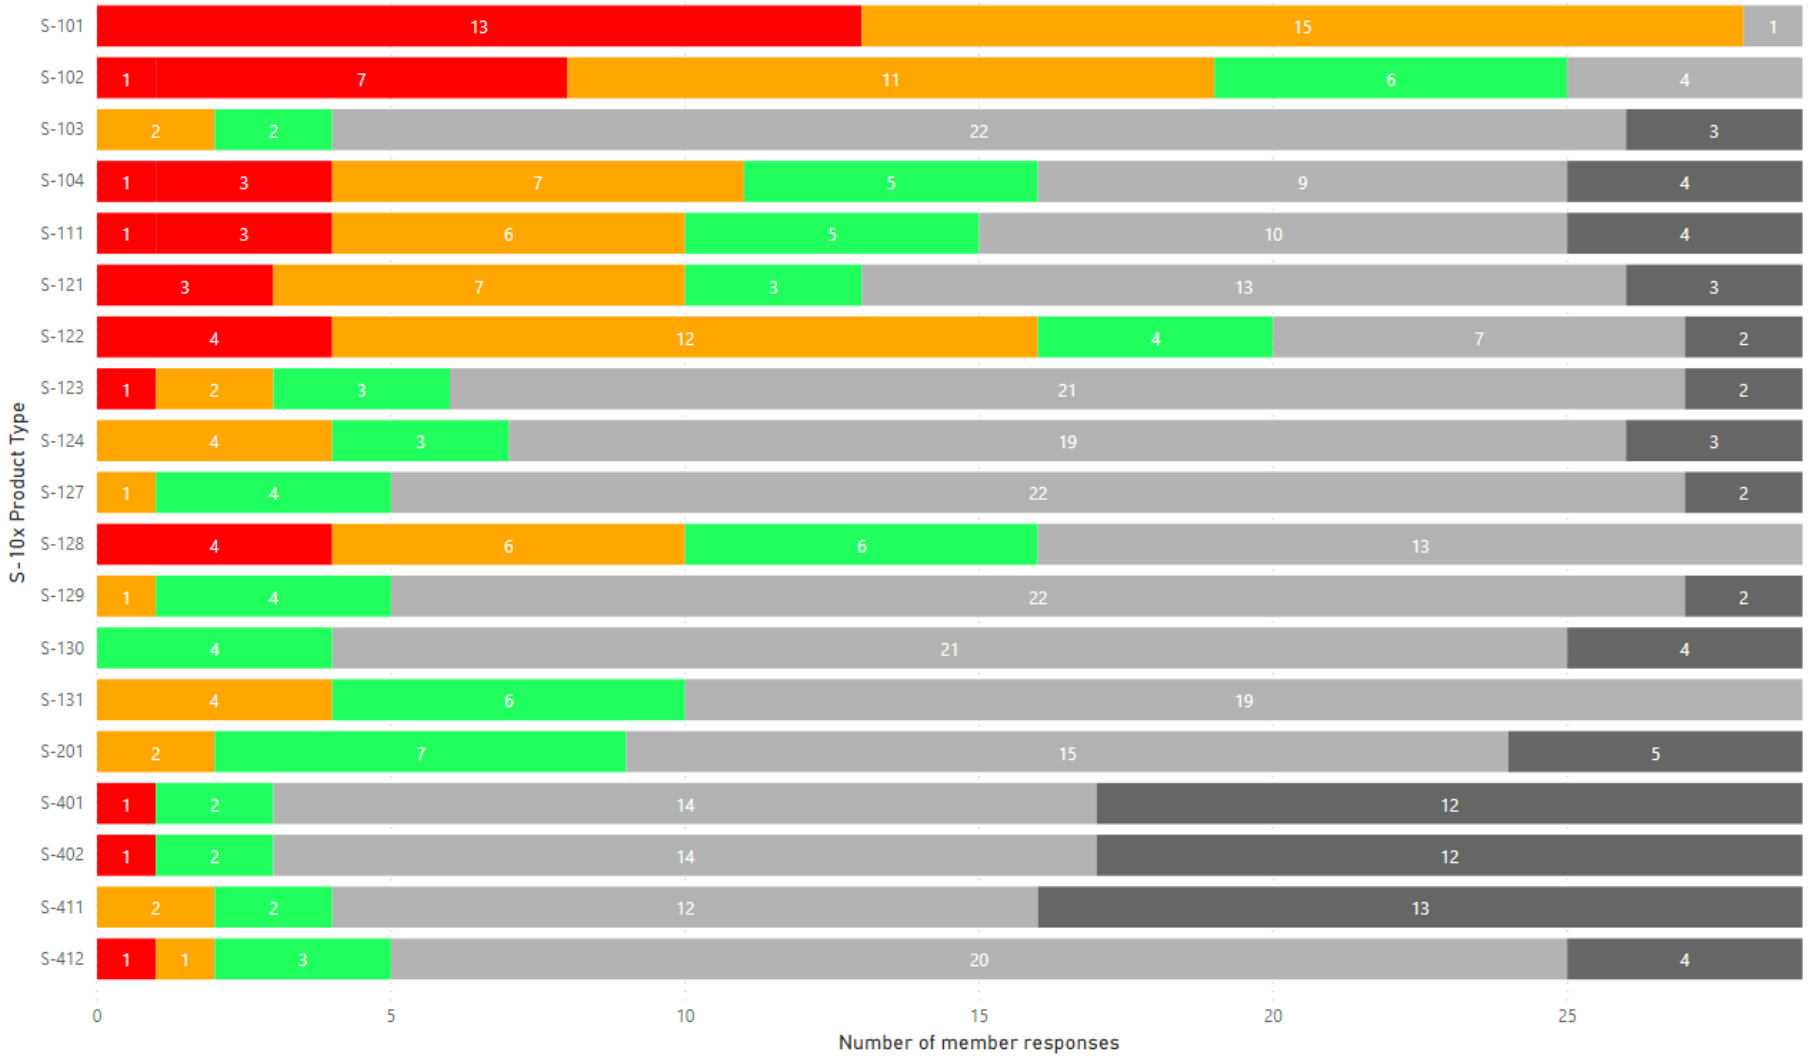
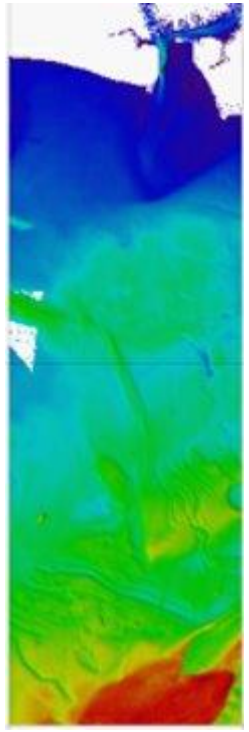
2022 IC-ENC Members S-10x Production Plans Survey



Timescale	
Now/very near	Now or expected during 2022
Near-term	2023 - 2024
Medium-term	Within the next 5 years - by 2027
Long-term	Within the next 10 years - by 2032
Unknown	Unknown
N/A	N/A

IC-ENC

To support our Members with their S100 requirements…



…IC-ENC is developing Production Support, Validation, Distribution & Revenue Management services for:

- S-101 - ENC (and *Conversion Readiness Service* (S-57 to S-101)
- S-102 - Bathymetric Surface Product
- S-104 - Water Level Information for Surface Navigation
- S-111 - Surface Currents
- S-122 - Marine Protected Areas
- (S-128)

IC-ENC Working together to assure navigational safety

ENC Service developments

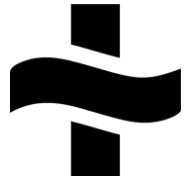
IC-ENC

S-57 ENC Validation

- IC-ENC conducts independent validation of data received from members
  - Ingest and registration checks – DMD
  - ECDIS load checks – 7Cs eGlobe, Transas 4000, JRC
  - Validation checks – 7Cs Analyzer, dKart Inspector

- Additional horizontal/vertical consistency checks and checks for overlaps/gaps are conducted

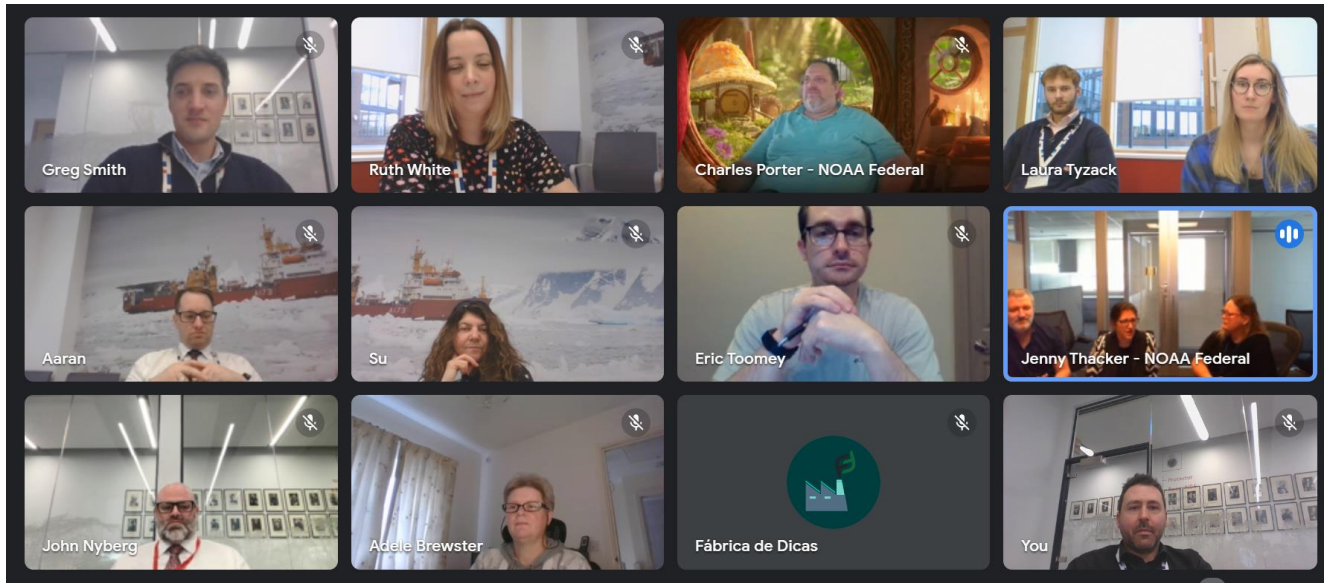
- A validation feedback report is provided to the member for each validation conducted

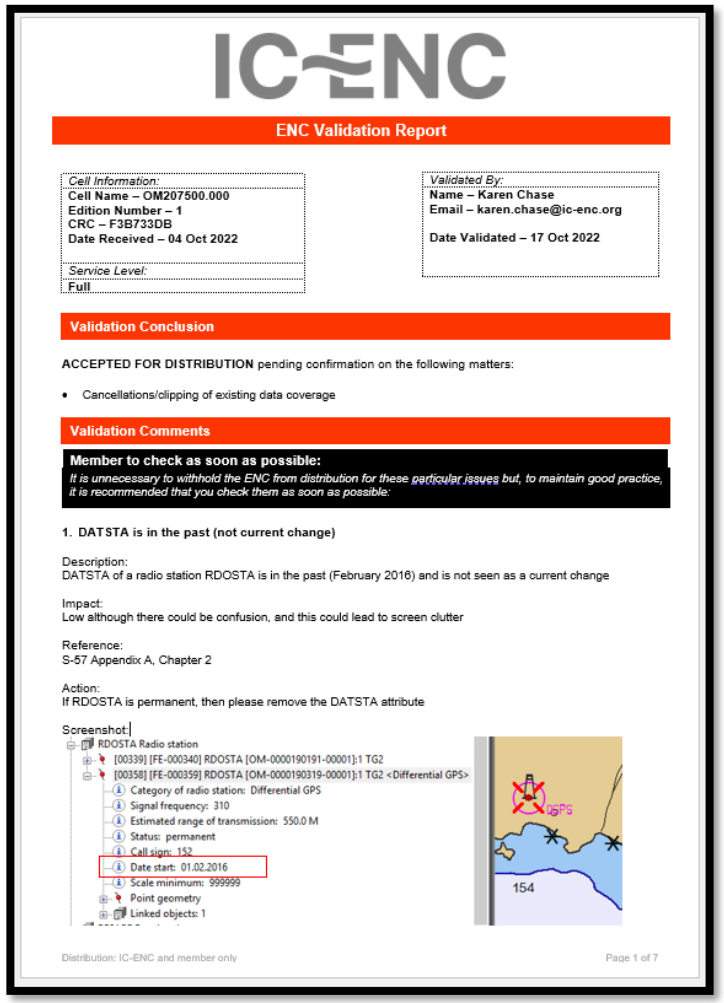


IC-ENC

S-57 ENC Validation – 2022 figures

- Over 15000 Validations completed in 2022.
- 782 New Cells released to VARs.
- **486 ENC files containing safety critical issues prevented from distribution.** 1400 with improvement recommendations





IC-ENC

ENC Validation Report

Cell Information:
Cell Name – OM207500.000
Edition Number – 1
CRC – F3B733DB
Date Received – 04 Oct 2022

Service Level:
Full

Validated By:
Name – Karen Chase
Email – karen.chase@ic-enc.org

Date Validated – 17 Oct 2022

Validation Conclusion

ACCEPTED FOR DISTRIBUTION pending confirmation on the following matters:

- Cancellations/clipping of existing data coverage

Validation Comments

Member to check as soon as possible:
It is unnecessary to withhold the ENC from distribution for these particular issues but, to maintain good practice, it is recommended that you check them as soon as possible:

1. DATSTA is in the past (not current change)

Description:
DATSTA of a radio station RDOSTA is in the past (February 2016) and is not seen as a current change

Impact:
Low although there could be confusion, and this could lead to screen clutter

Reference:
S-57 Appendix A, Chapter 2

Action:
If RDOSTA is permanent, then please remove the DATSTA attribute

Screenshot:

RDOSTA Radio station
[00339] [FE-000340] RDOSTA [OM-0000190191-00001]:1 TG2
[00358] [FE-000359] RDOSTA [OM-0000190319-00001]:1 TG2 <Differential GPS>
Category of radio station: Differential GPS
Signal frequency: 310
Estimated range of transmission: 550.0 M
Status: permanent
Call sign: 152
Date start: 01.02.2016
Scale minimum: 999999
Point geometry
Linked objects: 1

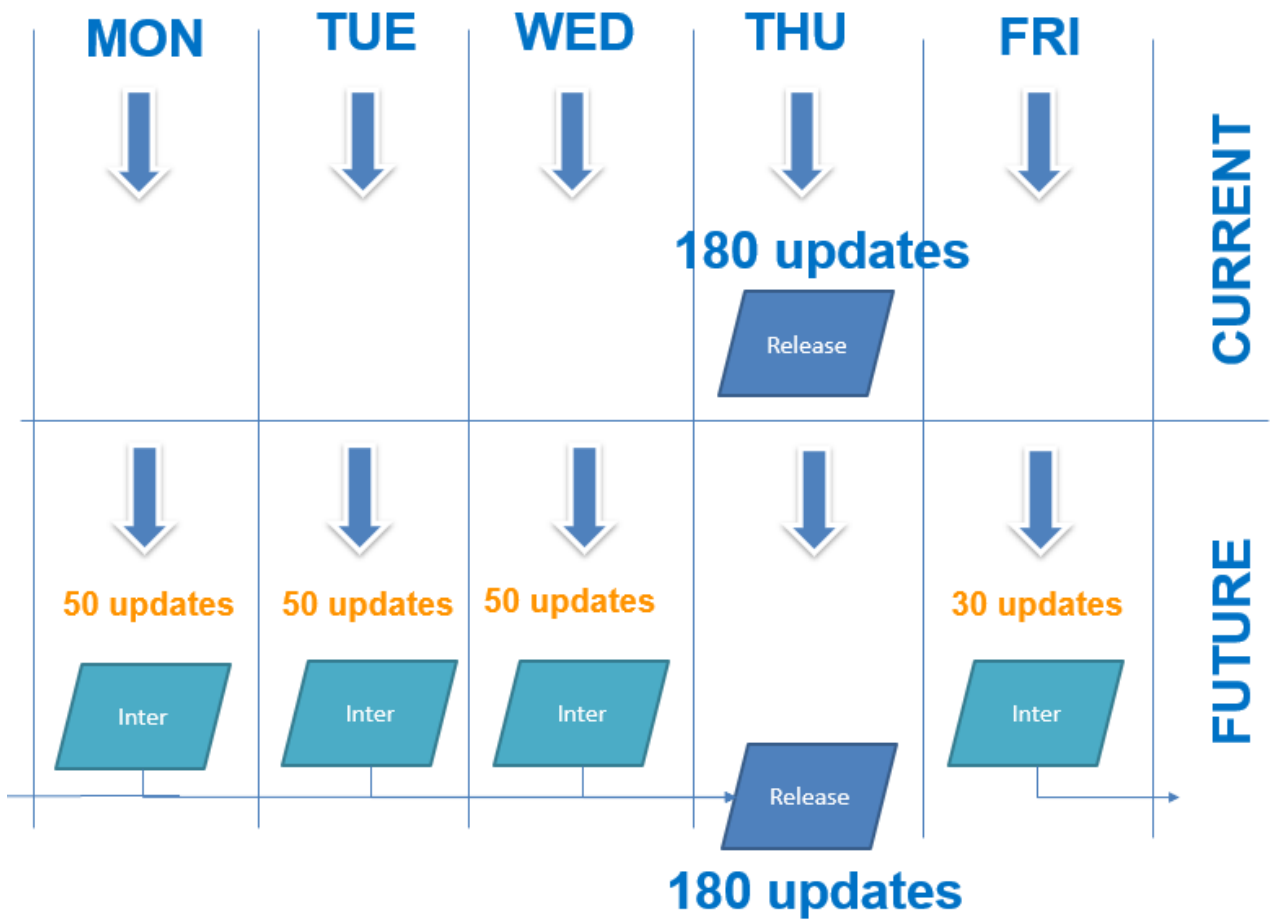
154

Distribution: IC-ENC and member only

Page 1 of 7

IC-ENC

Frequency of ENC release to VARs

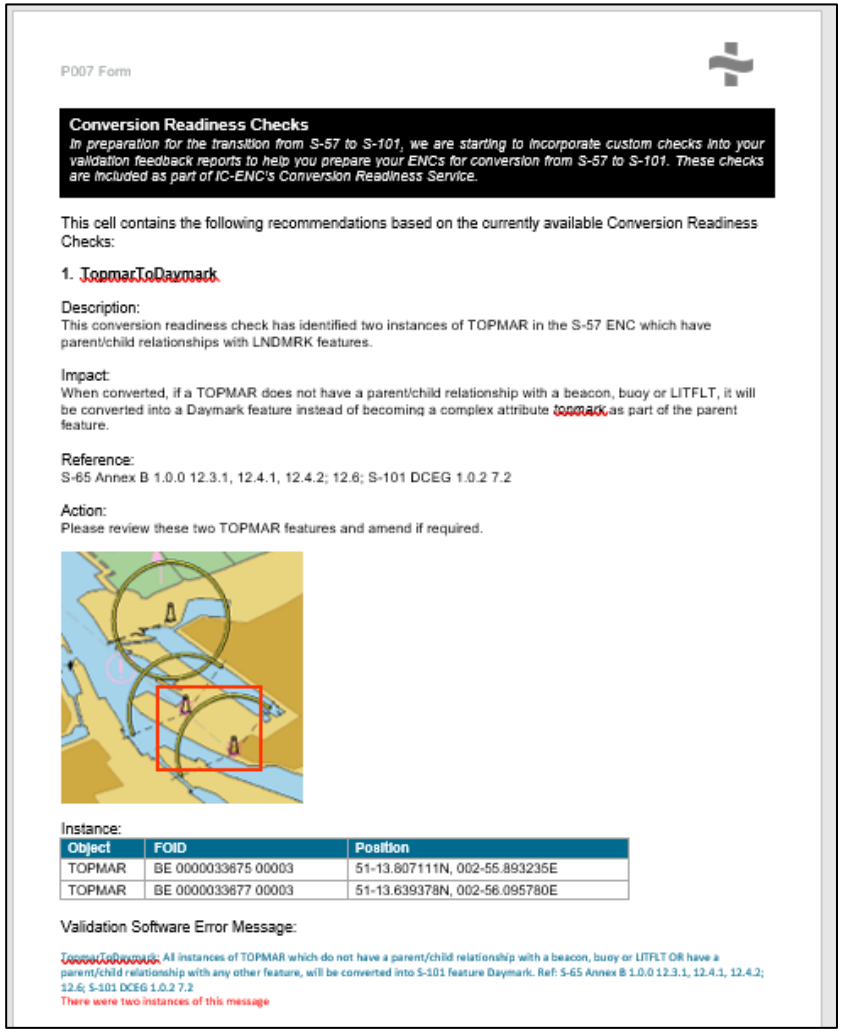


- **This week** we will publish a Daily Exchange Set to VARs to allow them to develop their receipt/upload processes.
- Process has been built to be able to increase frequency of release even further (i.e. multiple times per day) as required in the S100 era.

IC-ENC

ENC Conversion Readiness Service

- Support members in optimising their S-57 ENCs for conversion to S-101, i.e. “conversion ready ENCs”
- This service is an extension of the S-57 Validation Service and is now being performed on all base cell validations (New cells, New Editions).
- Key components:
  - A set of 20 Conversion Readiness Checks – SevenCs Analzyer (check files have been made available to Members)
  - Sample assessment of datasets – 10 ENCs from each Member.
  - Software tool testing
  - Global query capability
  - IC-ENC Technical Conference TC23-1 (March)



P007 Form

Conversion Readiness Checks

In preparation for the transition from S-57 to S-101, we are starting to incorporate custom checks into your validation feedback reports to help you prepare your ENCs for conversion from S-57 to S-101. These checks are included as part of IC-ENC's Conversion Readiness Service.

This cell contains the following recommendations based on the currently available Conversion Readiness Checks:

1. TopmarToDaymark

Description:
This conversion readiness check has identified two instances of TOPMAR in the S-57 ENC which have parent/child relationships with LNDMRK features.

Impact:
When converted, if a TOPMAR does not have a parent/child relationship with a beacon, buoy or LITFLT, it will be converted into a Daymark feature instead of becoming a complex attribute topmark as part of the parent feature.

Reference:
S-65 Annex B 1.0.0 12.3.1, 12.4.1, 12.4.2; 12.6; S-101 DCEG 1.0.2 7.2

Action:
Please review these two TOPMAR features and amend if required.

Instance:

Object	FOID	Position
TOPMAR	BE 0000033675 00003	51-13.807111N, 002-55.893235E
TOPMAR	BE 0000033677 00003	51-13.639378N, 002-56.095780E

Validation Software Error Message:

TopmarToDaymark: All instances of TOPMAR which do not have a parent/child relationship with a beacon, buoy or LITFLT OR have a parent/child relationship with any other feature, will be converted into S-101 feature Daymark. Ref: S-65 Annex B 1.0.0 12.3.1, 12.4.1, 12.4.2; 12.6; S-101 DCEG 1.0.2 7.2
There were two instances of this message

IC-ENC

Conversion Readiness Service – invitation to WENDWG delegates

- To be discussed at upcoming IC-ENC Technical Conference.
- PRIMAR invited as Observers.
- Invitation is to be extended to IC-ENC Steering Committee delegates
- I'm pleased to extend this invitation to WENDWG delegates…
  - **Tuesday 14th March** (European morning), Microsoft Teams
  - James.Harper@ic-enc.org to request more details.

IC-ENC

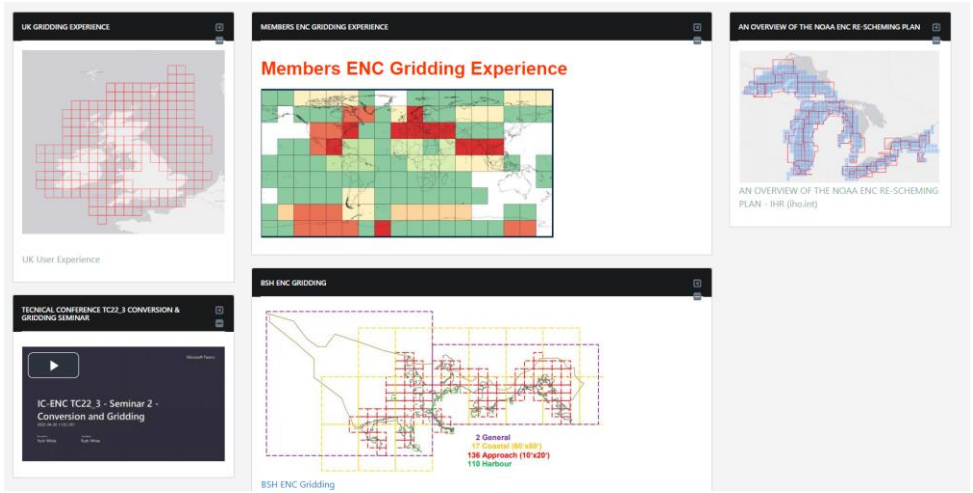
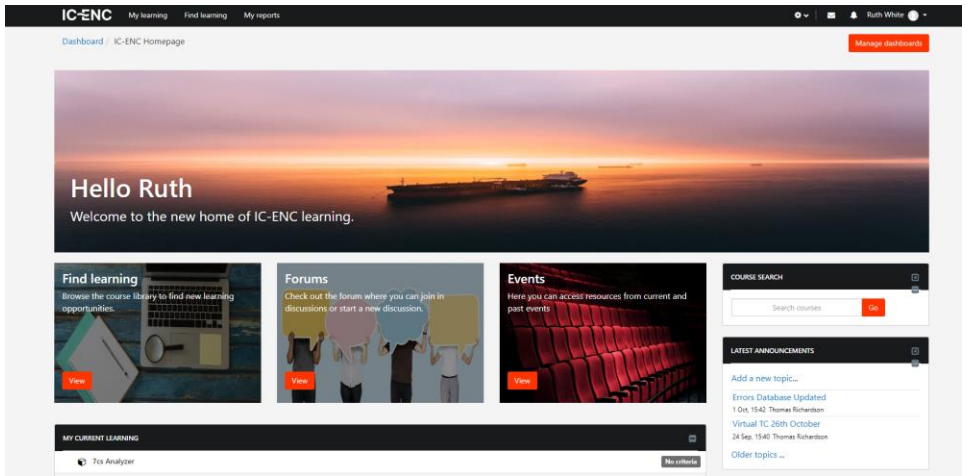
Learning Management System Developments

- The LMS is being developed through the Production Support Working Groups input (CL, NG, NL, PT, SR, UK, US)
- The LMS has **nearly 500 users.**
- It is evolving and dedicated draft dashboards are being created and developed on subjects such as HD ENCs and ENC Gridding (S57/S101), ENC Conversion, S100.
- We deliver training/seminars etc through it.
- Forum for Member collaboration.





IC-ENC Working together to assure navigational safety

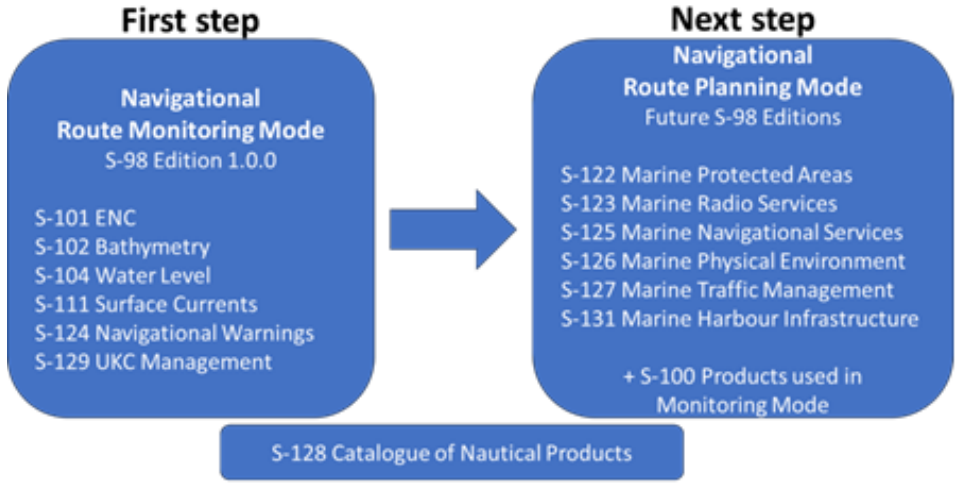
S-128

IC-ENC

Addition of S-128 into IC-ENC Work Plan

- 2023 IC-ENC Work Plan theme for S-128: Catalogue of Nautical Products (CNP)
  - Describes the status of nautical products
  - Edition 1.0.0 endorsed at HSSC14 for implementation and testing
- Part of the critical framework in the IHO S-100 Roadmap

  - ECDIS requirements:
    - Essential part of the S-100 ECDIS for update status
    - Provides coverage information to show availability of datasets
  - Source for IC-ENC S-100 graphical catalogue.
  - RENC to RENC collaboration - joint S-128 paper to WENDWG13



The IHO Navigational Package to be handled by the Interoperability Specification S-98. Additional layers may be added in the future.

IC-ENC

S-128 DMD Integration

- IC-ENC Data Management Database initial capability built to generate S-128 datasets.
- .GML files generated using IHO S-128 schema.
- To be generated for all IC-ENC exchange sets (in time, it will replace some existing S57 metafiles).
- Dataset naming convention: 128IC00S101ABC123.GML

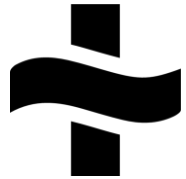
IC-ENC Working together to assure navigational safety

S-1XX Product Development and Testing scheme

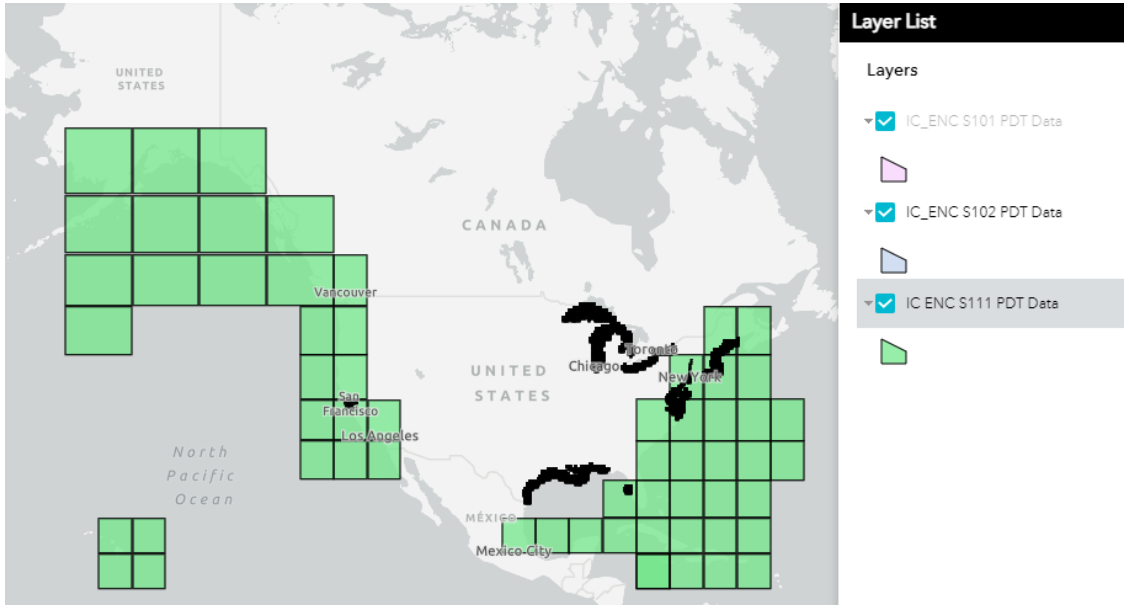
IC-ENC

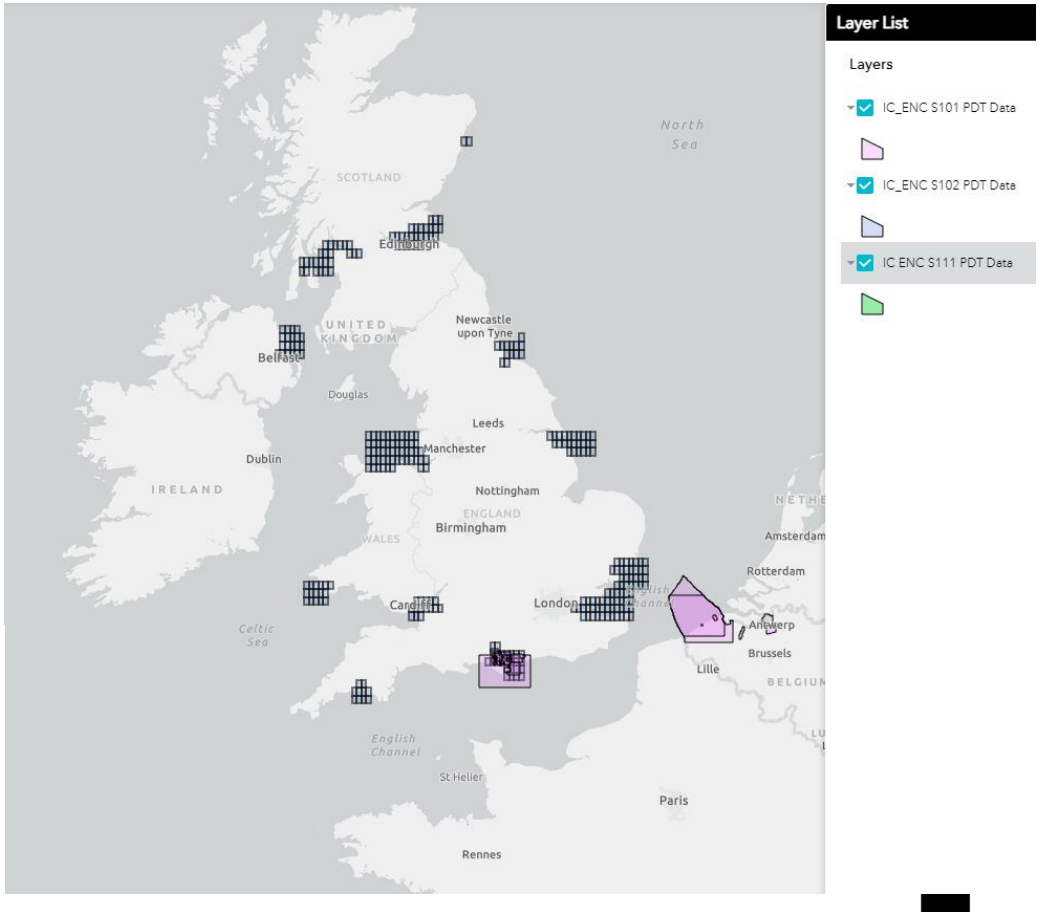
Product Development & Testing Licence

- A new development designed to support the S-100 era
- It supports innovation and developments of new service, tools, technology, hardware etc.
- 20 out of 48 IC-ENC Members have responded and “opted in”
  AU, BE, BH, DE, DK, EG, ES, FO, GB, GR, IS, MY, NL, NZ, PH, PK, PT, SR, US, ZA.
- IC-ENC Circular Letter 2021/30 - this can be resent to Members on request
- Comprehensive **feedback** mechanism in development (structured user research) in order to feed the lessons learned back to Members, IHO groups etc.



Product Development & Testing - content





Release	Date	Data added	Comments
3	20230113	17 x GB S-101 ENCs 303 x GB S-102 datasets	
2	20221031	7 x BE S-101 ENCs 47 x NOAA S-111 exchange sets	The BE S-101 ENCs were created by IC-ENC by converting the S-57 ENCs using CARIS HPD 4.1.29
1	20220425	86 x NOAA S-102 datasets 1 x NOAA S-111 dataset

IC-ENC Working together to assure navigational safety

Distribution & Revenue Management Services

IC-ENC

Distribution is via appointed “Value Added Resellers”

ADMIRALTY Maritime Data Solutions

ChartWorld Navigation Experts

NAVTOR

PRIMAR®

- These organisations are appointed to deliver ENCs to **ECDIS** navigators securely and swiftly. A new **Online Product Viewing Service** policy to allow shore-based viewing of ENCs to support safety at sea is coming.
- IC-ENC appoints, oversees and audits this distribution chain, and manages the revenue generated.
- Last financial year: over USD60million returned to IC-ENC members through this process.
- All four VARs have joined the S100 PDT scheme, their feedback will inform IC-ENC’s proposals for **distribution policies for S100 products**

IC-ENC

Distribution is via appointed “Value Added Resellers”

ChartWorld Navigation Experts

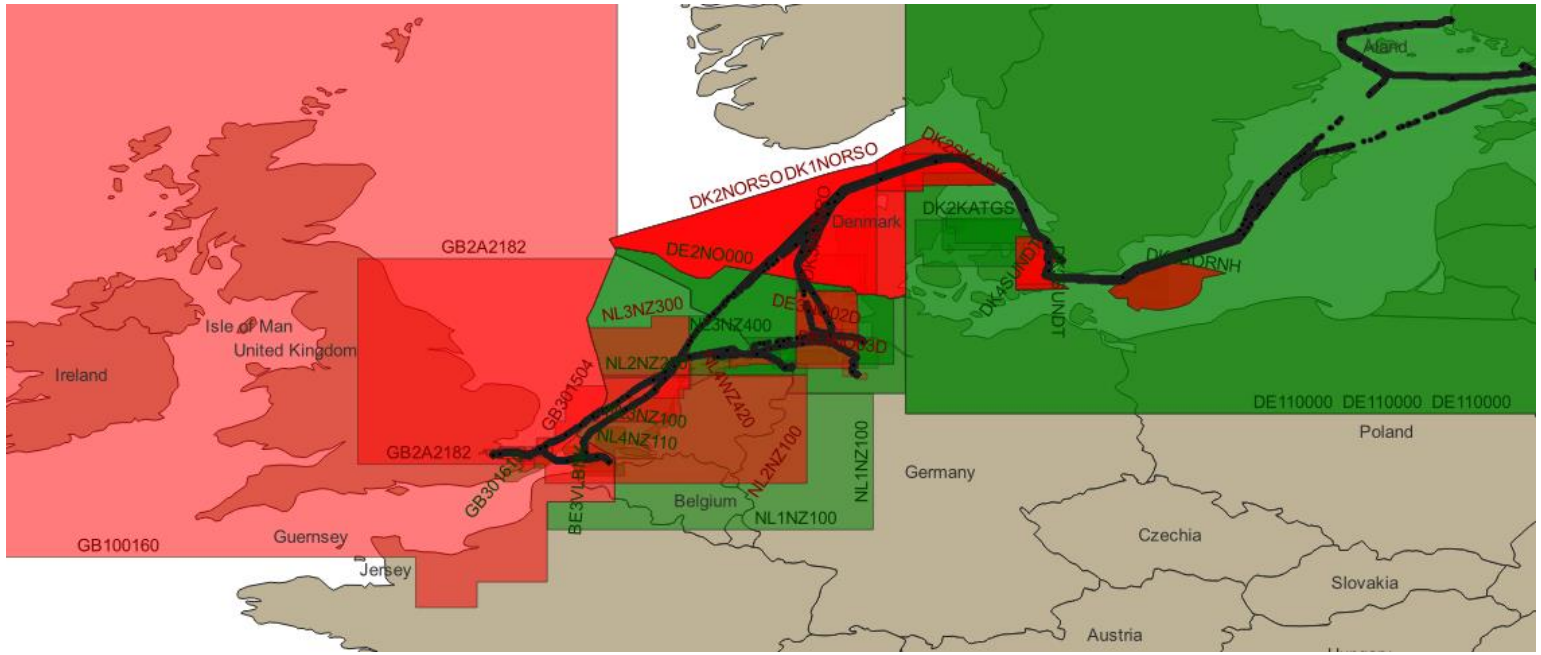
rr-consult (operating as O-charts)

iNavX

iNavX, powered by SilTech

- These organisations are appointed to use ENC data to support the safe navigation of **non-ECDIS** vessels.
- This is a new service, and now **over half** of IC-ENC Members participate.
- We are in the process of onboarding further Members and distribution companies.

Distribution Assurance Activity – audit tool

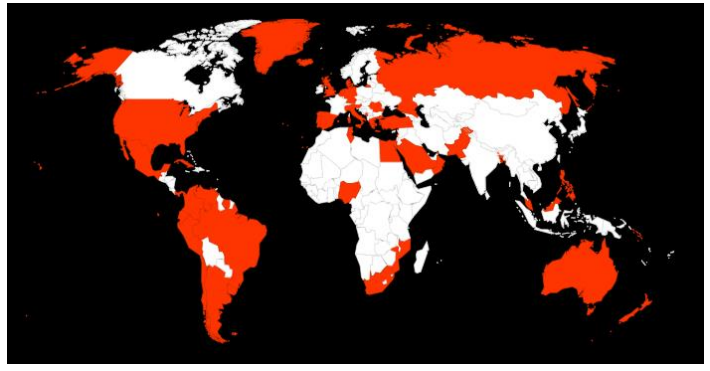


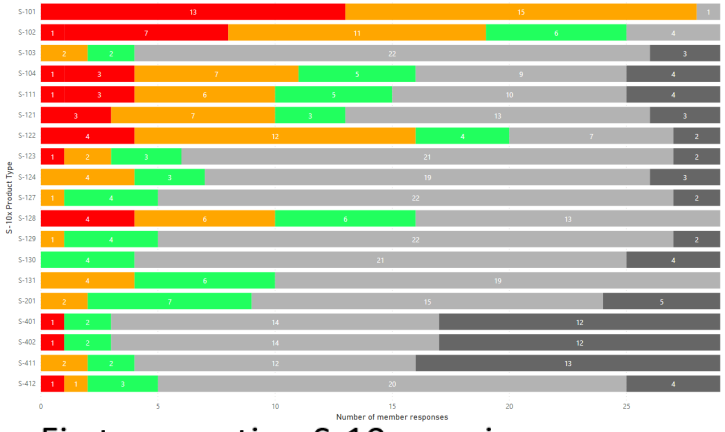
- Analysis using: AIS, ENC catalogue, Vessel characteristics database, sales reports.
- We are now working with the VARs on the first set of results from this tool.
- Both ENC supply chain and financial implications.

IC-ENC Working together to assure navigational safety

Summary

IC-ENC Summary

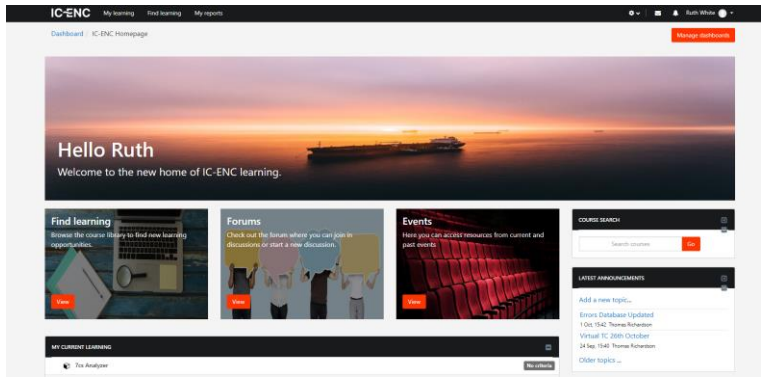


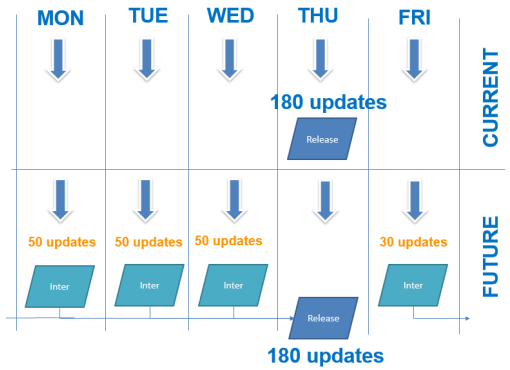


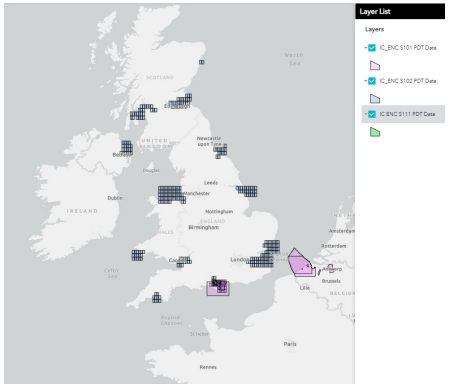
- First generation S-10x services:
  - S-101 - Electronic Navigational Chart (ENC)
  - S-102 - Bathymetric Surface Product
  - S-104 - Water Level Information for Surface Navigation
  - S-111 - Surface Currents
  - S-122 - Marine Protected Areas
  - S-128 - Catalogue
  - Conversion Readiness Service (S-57 to S-101)

- We have a large number of Members across the globe…
- …each has different (!) challenges, priorities and plans for S100…
- ….yet we have achieved agreement amongst the to set IC-ENC's priorities and are developing our future services…

IC-ENC Summary

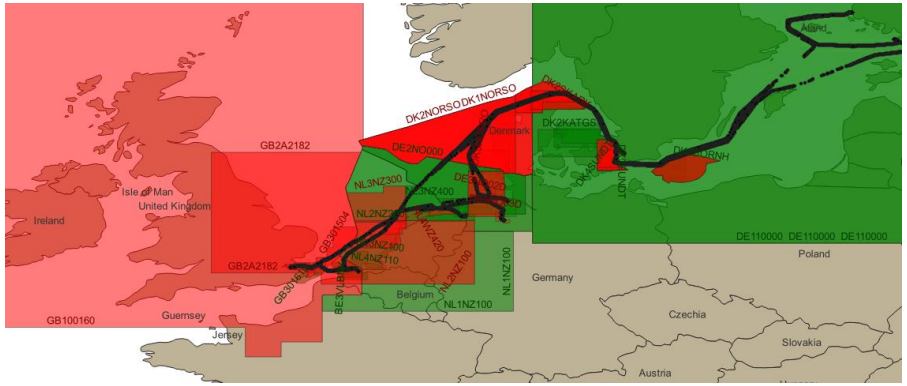






- …through help and support to Members…
- …and by improving our technology….
- ….we now have the first set of Members' S100 products available…

IC-ENC Summary



- …to our Value Added Reseller partners….
- …over whom we are improving our management and oversight.
