

**Paper for Consideration by WENDWG14****INToGIS III Mock-up to provide planned ENDS coverage**

<b>Submitted by:</b>	Germany (BSH)
<b>Executive Summary:</b>	This paper proposes the provision of e INToGIS III mock-up as discussion source for HOs to determine user needs
<b>Related Documents:</b>	IHO Web Catalogue
<b>Related Projects:</b>	INToGIS III

**Introduction/Background**

The current IHO Web catalogue INToGIS II is providing detailed information on paper and electronic charts, Annex A.

S-128 is the S-100 complaint standard for catalogues of nautical products.

The next version of the catalogue INToGIS III will introduce nautical publications and will provide an S-128 interface, Annex B.

**Analyses/Discussion**

The INToGIS II and the INToGIS III web catalogues are providing information on coverage of nautical products. Both versions are not designed to provide information on what is planned to be produced. This gap is the basis of a proposal to provide HOs a tool useful to set up production plans. HOs can approach stakeholders and discuss the plans. In the best case, HO can adjust the S.100 ENDS production according to the stakeholders need, Annex C.

**Recommendations**

BSH recommends using such a planning tool. The presentation of the planned product coverage is the basis for discussions between HOs and stakeholders.

**Justifications and impacts**

This approach could ensure that HOs produce in the beginning of the S-100 implementation exactly what the stakeholders' requested. The HOs invest their resources appropriately.

**Conclusion**

The proposed tool increases the reputation of the IHO and the HOs by enabling a closer communication between HOs and stakeholders. The result of this communication is a sufficient and user focussed product provision from the start of the S-100 END implementation.

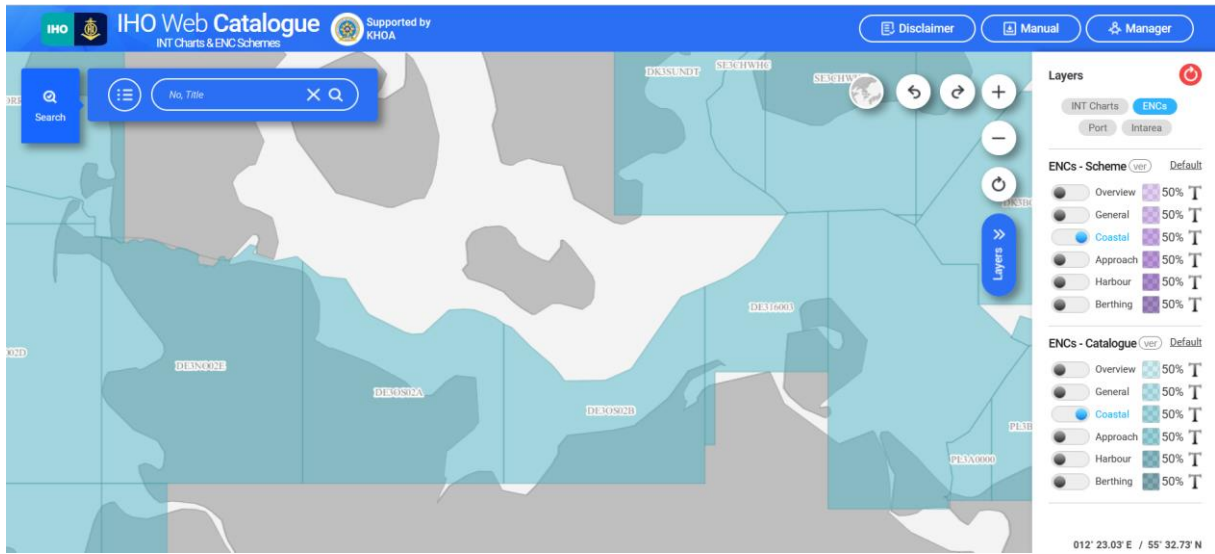

**Action required of WENDWG14:**

The WENDWG14 is invited to:

- a. Discuss the proposal
- b. To decide whether the Mock-up is appropriate and worth being progressed
- c. If b) is decided appropriate, invite BSH to make this mock-up publicly available.
