4. Operational Issues:

Iqaluit NAVTEX station was off air for a total of 674 hours between 15 May and 29 November 2018. NAVAREA XVIII coordinated with NAVAREA IV to ensure it issued navigational warnings to denote the outages. The Iqaluit issue was complex. It included various equipment issues, which included a damaged line feed between transmitter and the tower—a difficult repair.

In June 2019, the Chair of the IMO NAVTEX Coordinating Panel advised he received a complaint that Robin Hood Bay NAVTEX was transmitting outside of its allocated broadcast schedule and causing interference with Jeloya, Norway. An investigation revealed that the system was transmitting the 0220

broadcast 20 minutes early. The technicians resolved the problem and the transmitter is again compliant with its assigned broadcast schedule.

In 2018, the Dominican Republic began sending MSI for the first time. Last year they sent a total of nine MSI reports. This year they have sent five. Cuba continues to regularly provide MSI: five reports in 2018 and four in 2019. Cuba and the Dominican Republic both completed the MSI course in 2017 and 2016, respectively. NAVAREA IV greatly appreciates the Dominican Republic’s and Cuba’s contributions and their support to ensuring safe navigation.

In 2018, NAVAREA IV/XII received MSI from 27 (54%) of 50 national coordinators, an increase from 40% in 2017. Thirty-two of 50 (64%) national coordinators have completed the IHO MSI capacity building course.

Do you issue “In Force warnings” Bulletins? Yes.

How do mariners find the text of your “In Force” warnings that are more than 42 days old and which are no longer broadcast? In-Force NAVAREA IV and XII messages are posted each morning (to <http://msi.nga.mil/NGAPortal/MSI.portal>) from the previous 24hrs. Active NAVAREA IV and XII messages can be queried by a variety of menu options to include by specific NAVAREA, by NAVAREA number, by a NAVAREA number range and by date and date range

5. Quality Management Survey

6. Contingency Planning

NAVAREA IV and XII have fully redundant along with site separated NAVAREA operational systems to include: satellite transceivers, telecommunications, internet and desktop PC’s. Operations are tested on a daily basis at both locations to ensure full continuity of NAVAREA operations.
