# **OBSERVATIONS**

International  
Hydrographic  
Organization

- 1. The Self-Assessment process is being adjusted/reviewed**
- 2. The current SPI arguably gives a misleading representation of the status of MSI provision globally**
- 3. The IMSAS audit is producing/generating some ‘interesting’ outcomes**
- 4. There is a desire to refresh C-55**
- 1. Access to CB funding is limited and regional prioritization limits delivering assistance to where it is needed (sometimes?)**
