

NoteFromAlvaro.txt

The file (20200624_ECDIS Chart1_S52 PL_4_0_3.zip) contains Australia's input to S-52 PL 4.0.3.

It also includes the latest ECDIS Chart1 ENCs and version control document. Alvaro reported that, at least one of the updated ENC files, was not used by Hannu and strongly recommend all plots are re-generated from this dataset.

Based on ENCWG4 list of actions, the following support files should be amended and distributed to OEMs and MS (available for download from the IHO webpage) when S-52 PL 4.0.3 Part I is published:

1. New ECDIS Chart1 Exchange Set (new cells and updated README.txt).
2. Updated 'S-52 PresLib Ed 4.0.2 Part I App C Look-up Table Areas Symbolized.docx' file.
3. Updated 'PresLib_e4.0.2.dai' file.
