

PROPOSAL FOR S64 TEST DATA

- **2.5.7 d) ECDIS management of cancelled cells**
DataSet contains cancellation Update *.001 for GB280200
- **2.5.7 e) ECDIS Display of Replacement ENC Cells**
Status as per successful completion of test 2.5.7 d)
Data set contains update *.001 for Cancelled Cell GB280200
- GB280200 expected state listed in the table seems to be wrong in case if cell was removed
- If GB280200 retains in the system after cancellation there probably should be a comment that last Update 1 was not applied.

GB280200 cancelled cell (GB280200) should be reported by the system and either removed from the SENC or displayed with the appropriate warning.

Test	Cell Name	Exchange Set Content		Expected SENC Content		Notes
		Edition N°	Update N°	Edition N°	Update N°	
2.5.7e [Base]	GB380620	2	0	2	0	All ENC cells installed without error or warning
	GB380720	2	0	2	0	
	GB40162A	8	3	8	3	
	GB40162B	1	1	1	1	
	GB40182A	1	4	1	4	
2.5.7e [Update]	GB251200	1	8	1	8	Cells from the previous test 2.5.7d (same status)
	GB255000	3	0	3	0	
	GB280200	2	1	2	1	
	GB301620	2	4	2	4	Messages should be displayed as for 2.5.7d plus message relating to replaced cells: GB380620 is cancelled and replaced by GB383710 & GB383720 GB380720 is cancelled and replaced by GB389320
	GB380620	2	1	cancelled		
	GB380720	2	1	cancelled		
	GB40162A	9	0	9	0	
	GB40162B	2	1	2	1	
	GB40182A	1	5	1	5
