S-123 Task Group Update

NIPWG 2023 VTC 1 (March 2, 2023)

Presented by Bridget Gagné, Canadian Coast Guard
(S-123 Task Lead)

S-123 Task Group Updates

- Thirteen (13) task group meetings have been held to date.

- Review of the feedback comments is almost complete.
  - 6 out of 51 pages (12%) left to review with the task group.

- A few proposals are being worked on such as:
  - Remodelling of the radiocommunications complex attribute
  - Remodelling of the GMDSSArea and InmarsatOceanRegionArea features
  - Splitting of the NAVAREA/METAREA feature into two (2) separate features

Development of Edition 2.0.0

- It was mentioned in a previous NIPWG meeting regarding what would be needed for the S-123 Product Specifications to move into Edition 2.0.0:

    1. <u>Datasets Conforming to the Standard for Testing Purposes</u>
        - Check with S-164WG to determine where S-123 datasets fall in their work/timeline

    2. <u>Validation Checks</u>
        - Note S-100WG validation work to integrate into S-123 Edition 2.0.0

    3. <u>Portrayal</u>
        - IIC to plan dedicated sessions to testing portrayal and interoperability to move this aspect forward for the development of S-123 Edition 2.0.0

Closing Remarks

- The S-123 task group continues to make progress in their work.
    - The goal is to present the change proposal at a future NIPWG meeting.

- NIPWG is invited to:
    - note this presentation and
    - take any actions as appropriate.
