

S-101PT Letter 3/2021

12 May 2021

Announcement of S-101PT7

Dear S-101 Project Team Members,

I hope this letter finds you well. Firstly I would like to convey my apologies for the short notice of the next meeting of the next S-101PT meeting. This meeting was originally intended as simply a “catch-up” meeting, however considering the excellent work that has been done intersessionally, particularly by the S-101PT Sub-Groups, I consider that this meeting warrants full IHO meeting status.

The S-101PT7 meeting is planned for the 18 May 2021 and a draft agenda has now been published on the S-101PT7 [meeting page](#). Please indicate your intention to attend the meeting by email to myself thomas.richardson@ic-enc.org and jeff.wootton@iho.int at your earliest convenience. Also, if you have any further items to submit, please provide details to me at your earliest convenience.

The intention of this relatively short S-101PT meeting is to discuss action items from the recently held HSSC13 meeting and to receive updates from the various S-101PT Sub-Groups; as well discuss items of interest relating to the S-101PT Work Plan, Roadmap and Issues Log.

It would be very much appreciated if you could please review any S-101PT Actions assigned to you and be prepared to update the meeting on the Action status and any intended completion dates. The latest version of the S-101PT Consolidated Actions list can be downloaded from the S-101PT7 meeting page.

I look forward to meeting with you on 18 May.

Yours sincerely,

Thomas Richardson
(IHO – S-101PT Chair)
