

S-101PT Letter 02/2023

9th February 2023

S-101 Progress Update

Dear S-101 Project Team Members,

1. S-101PT10 Meeting

Further to S-101PT Letter 1/2023, SHOM have now provided logistical information for the meeting in Brest. This can be accessed from the S-101PT10 meeting page [here](#).

The objectives for this meeting will be as follows;

- To review any feedback or issues identified from edition 1.1.0 of S-101
- To review further change proposals and seek to agree on changes for edition 1.2.0
- To update our Work Plan as we move towards S-101 edition 2.0.0
- To discuss S-101 and the S-98 Interoperability Specification

An agenda will be published in due course. An election of office bearers will also be conducted at this meeting as it is the first PT meeting following the 3rd Session of the IHO General Assembly. Please note that attendance for this meeting is intended to be in-person.

2. S-101 Feature Catalogue 1.1.0

Following its preparation by KHOA and review by a small team, I am pleased to report that S-101 Feature Catalogue version 1.1.0 has now be placed on the Github site here;

<https://github.com/iho-ohi/S-101-Documentation-and-FC/tree/main/S-101FC/version%201.1.0>

Once the edition 1.1.0 Portrayal Catalogue is ready for publication an S-100WG Letter will seek its approval. If approved both the Feature and Portrayal Catalogues along with Test Datasets and the Validation Checks will be published in the IHO GI Registry and referenced from the planned S-101 Resources Page.

I would like to recognise the continued efforts by the Republic of Korea in support of the S-101PT and the assistance of the small Feature Catalogue review team.

Yours sincerely,

Tom Richardson
(IHO – S-101PT Chair)
