

Dossier de la OHI N° 6200/C8

**CARTA CIRCULAR 05/2025**

**23 de enero del 2025**

## REGISTRO DE ACTIVIDADES DEL DECENIO OCEÁNICO DE LA ONU

### PARTICIPACIÓN EN UNOC 3

### DECLARACIÓN POLÍTICA DE UNOC 3

Referencias:

- A. Documento del Consejo de la OHI: C8-05.2.2A
- B. CC del IRCC n° 01/2025
- C. Documento del Consejo de la OHI: C8-05.2.2B
- D. Informe del Retiro de Alto Nivel de UNOC

Estimado(a) Director(a),

1. Esta Carta Circular es para informarle de la creación de un Registro de Actividades del Decenio de las Ciencias Oceánicas para el Desarrollo Sostenible (Decenio Oceánico) de la ONU y para informarle de los últimos preparativos de la Secretaría de la OHI para participar en la próxima 3ª Conferencia Oceánica de la ONU (UNOC 3) en junio del 2025 en Niza, Francia, incluyendo la preparación de la Declaración Política de UNOC 3.

#### Creación de un Registro de Actividades del Decenio Oceánico

2. Después de la presentación de la Ref. A a la 8ª Sesión del Consejo de la OHI (C8), el Consejo invitó a la Secretaría de la OHI a considerar el desarrollo de un registro de representantes de Estados Miembros de la OHI que participan en el trabajo de sus Comités nacionales del Decenio Oceánico (si los hay), y de las actividades avaladas, compromisos voluntarios u otras contribuciones de los Estados Miembros individuales para el Decenio Oceánico o la serie de conferencias de UNOC.

3. A continuación, el Presidente del IRCC notificó a los miembros del comité por medio de la Ref. B de que se había creado ese registro. Por consiguiente, ahora se invita a los Estados Miembros a completar el [cuestionario online](#), para ayudar a poblar inicialmente este registro.

### **Preparación para la Participación en UNOC 3**

4. Después de la presentación Ref. C al C8, el Consejo acogió con satisfacción la propuesta de la Secretaría de la OHI y estuvo de acuerdo con el compromiso propuesto tanto en el Foro de Economía y Finanzas Azul (BEFF) de junio del 2025 en Mónaco como en la UNOC 3 en Niza. El Consejo animó también a los Estados Miembros a aprovechar la coincidencia de la IRCC-17 con el BEFF y la UNOC 2025, y a comprometerse rápidamente con las delegaciones nacionales para participar en consecuencia. Además, el Consejo invitó a la Secretaría de la OHI a informar a los Estados Miembros sobre la UNOC 3 a través de una CC de la OHI, anunciando una reunión de coordinación por VTC.

5. La Ref. B invitó a los Estados Miembros a informar al Adjunto a los Directores Samuel Harper ([samuel.harper@iho.int](mailto:samuel.harper@iho.int)) de su interés o intención de participar activamente en la UNOC 3 e informó de una reunión de coordinación por VTC prevista para las 1000 CET (UTC+1) del 24 de enero del 2025, en previsión de que los organizadores de la conferencia proporcionasen más detalles a su debido tiempo. Debido a la limitada respuesta a esta petición, y a un retraso en el suministro de información clave por parte de los organizadores, la reunión de coordinación prevista se celebrará ahora a las 1000 CET (UTC+1) del 30 de enero del 2025. Por favor tenga en cuenta que si desea participar en esta reunión debe informar con antelación al Adjunto a los Directores Harper, ya que sólo se proporcionarán instrucciones de participación a quienes lo hagan así.

### **Contribución a la Declaración Política de UNOC 3**

6. Uno de los principales resultados de la UNOC 3 será una declaración política que establezca los compromisos de los Estados Miembros de la ONU como legado de la conferencia. Australia y Cabo Verde compartieron recientemente un borrador cero de la declaración política de 2025 en su papel de cofacilitadores del proceso de negociación de la declaración. El 27 de enero del 2025 se celebrará una primera ronda informal de negociaciones sobre la declaración en la Sede de la ONU en Nueva York. Le seguirán otras tres rondas de negociaciones antes de la finalización de la declaración política antes del 1 de mayo del 2025. El Borrador Cero de la declaración política de la UNOC 3 está disponible en la [página web de la Conferencia](#).

7. Como se informó en la Ref. D, la Secretaría de la OHI estuvo representada en un 'Retiro de Alto Nivel de la UNOC' en el que se debatió la declaración política en presencia del Subsecretario General de Asuntos Económicos y Sociales (y Secretario General de la UNOC3), el Enviado Especial del Secretario General de la ONU para el Océano, Representantes Permanentes de los Estados ante la ONU, altos representantes de las dos Naciones coanfitrionas (Francia y Costa Rica) y de los dos cofacilitadores de la Declaración Política. Se llamó la atención de los participantes sobre el hecho de que actualmente no se menciona la cartografía de los fondos marinos en la declaración política, y se defendió su inclusión. Los organizadores y cofacilitadores tomaron buena nota de esta observación, que fue reconocida como prioritaria por S.E. el Enviado Especial para el Océano en su discurso de clausura. Sin embargo, para asegurar que se incluye la cartografía de los fondos marinos en el borrador definitivo de la declaración política, deben proponerlo los estados miembros de la ONU durante el proceso de negociaciones.

8. Francia, Costa Rica y la COI están organizando una sesión informativa en persona titulada 'Ciencia Oceánica para la Toma de Decisiones y la Acción en la Conferencia Oceánica 2025 de Naciones

Unidas' para el 27 de enero del 2025 en la Sede de Naciones Unidas inmediatamente antes de la primera sesión informal de negociaciones.

9. Dada la estrecha colaboración de la OHI con la COI, en particular como organizaciones copatrocinadoras de GEBCO, las Secretarías de las dos organizaciones están trabajando conjuntamente para proporcionar a nuestros respectivos estados miembros apoyo en la preparación del proceso de negociación, para asegurar que las prioridades clave relativas a la hidrografía, la cartografía de los fondos marinos y las ciencias oceánicas se recojan debidamente en la declaración política. Para ello, el Anexo A proporciona sugerencias de edición de una versión no oficial de la declaración política para su consideración por los estados miembros de la OHI (y por extensión sus delegaciones nacionales ante la ONU). Las ediciones sugeridas por la Secretaría de la OHI están en rojo, y las ediciones de la Secretaría de la COI están en azul. Estas ediciones propuestas se presentan de buena fe, respetando que los estados miembros individuales tienen sus propias posiciones nacionales sobre asuntos de Naciones Unidas. Si es posible, sería extremadamente útil que los estados miembros mantuvieran informada a la Secretaría de la OHI sobre sus respectivas posiciones nacionales, el apoyo deseado a las sugerencias conjuntas OHI / COI y cualquier otro progreso nacional relevante sobre este tema.

Atentamente,

A handwritten signature in blue ink, appearing to read 'Mathias Jonas', with a stylized flourish at the end.

Dr. Mathias JONAS  
Secretario General

## ANNEX A

### Unofficial version of Zero Draft of 2025 United Nations Ocean Conference Political Declaration with suggested edits for the information of Member States of IOC/UNESCO

#### Our ocean, our future: accelerating action

- 1 We, the Heads of State and Government and high-level representatives, meeting in Nice from 9 – 13 June 2025 at the United Nations Conference to Support the Implementation of Sustainable Development Goal 14 of the 2030 Agenda for Sustainable Development, with the full participation of civil society and all stakeholders, affirm our strong commitment to conserve and sustainably use our ocean, seas and marine resources for sustainable development.
- 2 We share one ocean, and we remain gravely concerned with the global emergency it faces from the impacts of the triple planetary crisis of climate change, biodiversity loss, and pollution. Action is not advancing at the speed or scale required to meet SDG 14. A healthy and resilient ocean is essential for a sustainable ocean economy and underpins cultural and social connections to the ocean. We must act with urgency to face this challenge with bold, ambitious, just and transformative action, and ensure all people, including women and girls, people with disability, youth, Indigenous Peoples, and other marginalised groups are empowered and included in ocean-related decision-making.
- 3 We emphasize that our actions to implement Goal 14 should be in accordance with, reinforce and not duplicate or undermine existing legal instruments, arrangements, processes, mechanisms or entities. We affirm the need to enhance the conservation and sustainable use of the ocean and its resources by implementing international law as reflected in the United Nations Convention on the Law of the Sea (UNCLOS), which provides the legal framework for the conservation and sustainable use of oceans and their resources, as recalled in paragraph 158 of The Future We Want. We recognise the importance of UNCLOS to advancing sustainable development and its near universal adoption by States, as recalled in paragraph 159 of The Future We Want, and in this regard we urge all its parties to fully implement their obligations under.
- 4 We recall the Pact for the Future and our decision to take ambitious action to restore the ocean and its ecosystems, and to improve its health, productivity, sustainable use and resilience.

#### Defending ocean ecosystems

- 5 We note the ocean plays an essential role in addressing climate change, and are deeply alarmed that the ocean's ability to act as a climate mitigator has been weakened due to the adverse impacts of climate change including ocean warming, ocean acidification, eutrophication and deoxygenation, compounded by marine pollution and biodiversity loss.
- 6 We underline the importance of the ocean-climate-biodiversity nexus and call for concerted global action to minimise the impact of climate change on ocean biodiversity.
- 7 We affirm our commitment to continued cooperation to address climate change-related sea level rise and its effects, and acknowledge the High-Level Meeting on Sea Level Rise held in New York on 25 September 2024. We recognise sea level rise due to climate change disproportionately impacts Small Island Developing States (SIDS), least developed countries, and coastal communities, and acknowledge the urgent need for collective action to enhance

their adaptive capacities and resilience while mitigating climate change. Marginalised groups bear the brunt of many of the negative consequences of climate change and sea level rise.

- 8 [\[Proposed new text\] We reaffirm our commitment to supporting implementation of the Antigua and Barbuda Agenda for SIDS \(ABAS\) – a Renewed Declaration for Resilient Prosperity.](#) We commend the leadership of SIDS in managing the challenges associated with sea level rise, and note in particular the Pacific Islands Forum Declaration on Preserving Maritime Zones in the face of Climate Change-Related Sea-Level Rise and the Alliance of Small Island States Declaration on Sea Level Rise and Maritime.
- 9 We welcome the contribution of the International Law Commission (ILC) to our understanding of the relationship between sea level rise and international law through its study on “Sea-level rise in relation to international law” and encourage States’ continued engagement with the ILC on this topic.
- 10 We acknowledge the 2024 Advisory Opinion of the International Tribunal for the Law of the Sea on the Request for an Advisory Opinion submitted by the Commission of Small Island States on Climate Change and International Law. We encourage all States to meet their obligations to prevent, reduce and control the pollution of the marine environment and to protect and preserve the marine environment in relation to the impacts of climate change.
- 11 We remain concerned the high and rapidly increasing levels of plastic pollution represents a serious environmental problem at a global scale, negatively impacting the environmental, social, health, and economic dimensions of sustainable development. We recognise the transboundary nature of plastic pollution and efforts to address this crisis through trade, including through the WTO Dialogue on Plastics Pollution.
- 12 We reaffirm our shared commitment to accelerate action to prevent, significantly reduce and control marine pollution of all kinds, [\[Proposed new text\] including emerging pollutants and pollutants from land-based sources.](#) We support the work of the IMO in further addressing ship-sourced pollution and dumping in the marine environment, including biosecurity risks, and encourage members to address the issue of ghost gear.
- 13 We reaffirm the need to strengthen integrated coastal zone management, marine spatial planning and climate [\[Proposed new text\] mitigation](#) interventions and adaptation strategies to enhance the resilience of coastal and marine ecosystems. [\[Proposed new text\] We recognize the need for improving disaster risk reduction and preparedness for more extreme weather events.](#) We commit to ecosystem-based approaches and nature-based solutions to protect [\[Proposed new text\] and restore](#) natural buffers such as mangroves, seagrasses, and coral reefs, while supporting sustainable livelihoods and biodiversity and pledge to support the implementation of the Early Warnings for All initiative to ensure coastal communities vulnerable to hazardous weather, water or climate events have equitable access to timely, accurate, and actionable information.
- 14 We reiterate the need to increase scientific knowledge on deep sea ecosystems and emphasise the importance of a precautionary approach, including for deep sea mining. We welcome the work of the International Seabed Authority towards the development of robust rules, regulations and procedures in accordance with the UNCLOS.

## Sustainable ocean economies

- 15 We recognise the tremendous opportunities offered by sustainable ocean-based economies for States, particularly SIDS, to achieve economic growth and social development while safeguarding the health, resilience and productivity of marine ecosystems for present and future generations.
- 16 We recognise the essential role of sustainable ocean plans in achieving sustainable ocean economies [\[Proposed new text\] whilst ensuring the sustainable use and conservation of marine ecosystems](#) and call on all coastal and ocean states to commit to the 100% Alliance, ensuring 100 per cent of ocean areas under national jurisdiction are sustainably managed by 2030. We commit to supporting capacity building, knowledge exchange, and financial mobilisation to enable countries, especially SIDS, to develop and implement sustainable ocean plans.
- 17 [\[Proposed new text\] We recognize the importance of supporting the achievement of the goals and targets of the Kunming-Montreal Global Biodiversity Framework as it relates to marine and coastal ecosystems including actions related to marine protected areas, marine invasive species and ocean acidification.](#) We will ensure by 2030 at least 30 per cent of terrestrial, inland water, marine, and coastal areas are effectively conserved and managed through ecologically representative, well-connected, and equitably governed systems of Marine Protected Areas (MPAs) and other effective area-based conservation measures, and at least 30 per cent of areas of degraded ecosystems are under effective restoration (30x30). These efforts should align with the Kunming-Montreal Global Biodiversity Framework, prioritise areas of critical importance for biodiversity, ecosystem functions and services, and recognise the integral role of Indigenous Peoples, and of local communities, including their traditional territories.
- 18 We underscore the central role of a healthy and resilient ocean in sustaining life on Earth, ensuring global food security, and supporting billions of lives. We are deeply troubled by the escalating depletion of many global fish stocks through overfishing and call for decisive and collective action to accelerate transition to sustainable fisheries and aquaculture systems, through enhancing marine spatial planning, science-based management, promoting, scaling up and replicating successes, and working together to fight illegal, unreported and unregulated fishing.
- 19 We encourage World Trade Organization (WTO) Members to deposit their instruments of acceptance of the WTO Agreement on Fisheries Subsidies to accelerate its entry into force and implementation. We call on members to conclude negotiations as soon as possible on additional provisions that contribute to overcapacity and overfishing to secure a comprehensive fisheries subsidies agreement.
- 20 We recognise the critical roles of maritime transport in the global economy and the challenges to transition the sector to sustainability. Decarbonisation of shipping remains an urgent priority. We welcome the International Maritime Organization's (IMO) adoption of the 2023 Strategy on Reduction of Greenhouse Gas Emissions from Ships and its enhanced common ambition to reach net-zero emissions from international shipping by or around.

## Accelerating action

- 21 We welcome the adoption of the Agreement under UNCLOS on the Conservation and Sustainable Use of Marine Biological Diversity Beyond National Jurisdiction, and encourage States to sign and ratify the Agreement to ensure its early entry into force. We welcome resolution 78/272 of the General Assembly establishing the Preparatory Commission to prepare for the entry into force of the Agreement and for the first Conference of the Parties and call upon States to engage in the Commission. We recognise the important role the Agreement will play in achieving 30x30. [\[Proposed new text\] We recognize the need to equip all nations with suitable technical and marine scientific capacity to benefit from and contribute to the implementation of the Agreement.](#)
- 22 We encourage states to take advantage of the updated modalities for describing ecologically or biologically significant marine areas and explore potential synergies with the future implementation of the BBNJ *[based on decision 16 of CBD COP 16]*.
- 23 We recognise the importance of the ongoing work of the Intergovernmental Negotiating Committee on an international legally binding instrument on plastic pollution, including in the marine environment, reaffirm our commitment to preventing, reducing and eliminating plastic pollution by taking effective measures throughout the lifecycle of plastics, and call upon participating delegations to work together to reach an ambitious agreement without delay *[based on UNSG background note and UNEP background document]*.

[\[Proposed new paragraph\] We recognize the importance of the United Nations Decade of Ocean Science for Sustainable Development \(2021 – 2030\) and its vision to achieve the science we need for the ocean we want. We support the Decade mission to generate and use knowledge for the transformative action needed to achieve a healthy, safe and resilient ocean for sustainable development by 2030 and beyond and support the science- based measures identified as priorities by the 2024 Ocean Decade Conference that will accelerate this action.](#)

- 24 Ocean action must be based on the best available science and knowledge, including Indigenous Knowledge, and that of all members of local communities. To that end we:
  - a. Affirm the value of strengthening [\[Proposed new text\] the co-stewardship and sharing of knowledge and expertise](#), including, where there is free, prior and informed consent, the knowledges and practices of Indigenous Peoples, traditional knowledge of local communities, and local knowledge systems. [\[Proposed new text\] We highlight the importance of supporting the generation and application of Indigenous-led research.](#)
  - b. Support new [\[Proposed new text\]](#) and ongoing scientific research [\[Proposed new text\] focused on improving understanding and developing solutions](#) to meet the multiple challenges of climate change, food security, energy transitions and biodiversity loss.
  - c. Commit to improving the scientific understanding of the ocean and supporting science-based measures to accelerate action, including through the United Nations Decade of Ocean Science for Sustainable Development (2021–2030) and the Regular Process for Global Reporting and Assessment of the State of

the Marine Environment, including Socioeconomic Aspects, and its World Ocean Assessments.

- d. Support a strong science-policy [\[Proposed new text\] - society](#) interface to provide timely, credible and salient scientific information to inform policies and actions.
  - e. Commit to strengthening [\[Proposed new text\] investments in coordinated](#) international, regional, subregional and national scientific observation and data collection, [\[Proposed new text\] sharing and management](#) efforts, including the development of integrated information management, infrastructure and systems that provide [\[Proposed new text\] open](#) access to reliable, timely and high-quality marine data.
  - f. Prioritise investments in the creation, expansion, and effective management of MPAs [\[Proposed new text\] and other effective area-based conservation efforts](#) to support the health and resilience of ocean ecosystems and the communities that depend on them [*based on UNSG background note*].
  - g. [\[Proposed new text\] Commit to implementing Ocean Literacy initiatives in educational frameworks and wider public awareness initiatives, emphasizing transdisciplinary, experiential and inclusive learning approaches that merge scientific and traditional knowledge to address systemic challenges such as climate change, biodiversity loss, and sustainable marine resource management, and to cultivate ocean stewardship across all sectors of society.](#)
  - h. [\[Proposed new text\] Commit to achieving a fully mapped seabed by creating a favorable policy environment that results in increased funding, advancement of suitable technology, and increased data sharing based on FAIR principles.](#)
- 25 We recognise [\[Proposed new text\] that SDG14 is one of the least well-funded SDGs and that](#) accelerating ocean action requires significantly increased finance. In this regard, we:
- a. [\[Proposed new text\] Commit to increased financing and investment to meet SDG targets and to support capacity development for SIDS, LDCs and marginalized groups including women and girls, youth, and Indigenous communities.](#)
  - b. Promote the recognition of the sustainable ocean economy as an attractive investment opportunity among mainstream financial institutions through instruments such as Blue Bonds and Blue Loans.
  - c. Encourage the private sector, including banks, insurers and investors, to redirect their products and services towards the transition to sustainable ocean-based economies by finding innovative solutions to support the health and resilience of the ocean.
  - d. Encourage the creation of financial instruments such as microfinance, payments for environmental services, credit mechanisms, grants, and subsidies.

- e. Encourage collaboration on blended finance mechanisms to de-risk investments in developing countries, facilitating a just transition.
- f. Ensure the mobilisation of resources, including concessional financing, from Multilateral Development Banks, sovereign wealth funds, and governments with a view to overcoming financial barriers, especially in developing countries.
- g. Support small-scale fishers, women and girls, youth, and Indigenous communities.
- h. Highlight that charities, philanthropies and other donors will be essential, including in providing grants and enabling capital and through concessional financing.

26 We value the voluntary commitments made to implement SDG 14, including at UN Ocean Conferences, and encourage partnerships to expand initiatives and increase their impact. We support the inclusive nature of voluntary commitments and underscore the need to implement a simple monitoring and reporting process to provide a collective metric for progress.
